SHARK
Shark, n. Etym: [Of uncertain origin; perhaps through OF. fr. carcharus a kind of dogfish, Gr. Shark, v. t.&i.); cf. Corn. scarceas.]

1. (Zoöl.)

Defn: Any one of numerous species of elasmobranch fishes of the order Plagiostomi, found in all seas.

Note: Some sharks, as the basking shark and the whale shark, grow to an enormous size, the former becoming forty feet or more, and the latter sixty feet or more, in length. Most of them are harmless to man, but some are exceedingly voracious. The man-eating sharks mostly belong to the genera Carcharhinus, Carcharodon, and related genera. They have several rows of large sharp teeth with serrated edges, as the great white shark (Carcharodon carcharias, or Rondeleti) of tropical seas, and the great blue shark (Carcharhinus glaucus) of all tropical and temperate seas. The former sometimes becomes thirty-six feet long, and is the most voracious and dangerous species known. The rare man-eating shark of the United States coast (Charcarodon Atwoodi) is thought by some to be a variety, or the young, of C. carcharias. The dusky shark (Carcharhinus obscurus), and the smaller blue shark (C. caudatus), both common species on the coast of the United States, are of moderate size and not dangerous. They feed on shellfish and bottom fishes.

SKEPTIC
Skep"tic, n. Etym: [Gr. skeptiko‘s thoughtful, reflective, fr. ske‘ptesqai to look carefully or about, to view, consider: cf. L. scepticus, F. sceptique. See Scope.] [Written also sceptic.]

1. One who is yet undecided as to what is true; one who is looking or inquiring for what is true; an inquirer after facts or reasons.

2. (Metaph.)

Defn: A doubter as to whether any fact or truth can be certainly known; a universal doubter; a Pyrrhonist; hence, in modern usage, occasionally, a person who questions whether any truth or fact can be established on philosophical grounds; sometimes, a critical inquirer, in opposition to a dogmatist.
All this criticism [of Hume] proceeds upon the erroneous hypothesis that he was a dogmatist. He was a skeptic; that is, he accepted the principles asserted by the prevailing dogmatism: and only showed that such and such conclusions were, on these principles, inevitable. Sir W. Hamilton.

3. (Theol.)

Defn: A person who doubts the existence and perfections of God, or the truth of revelation; one who disbelieves the divine origin of the Christian religion.
Suffer not your faith to be shaken by the sophistries of skeptics. S. Clarke.

Note: This word and its derivatives are often written with c instead of k in the first syllable, -- sceptic, sceptical, scepticism, etc. Dr. Johnson, struck with the extraordinary irregularity of giving c its hard sound before e, altered the spelling, and his example has been followed by most of the lexicographers who have succeeded him; yet the prevalent practice among English writers and printers is in favor of the other mode. In the United States this practice is reversed, a large and increasing majority of educated persons preferring the orthography which is most in accordance with etymology and analogy.

Syn.
-- Infidel; unbeliever; doubter.
-- See Infidel.

SKETCH
Sketch, n. Etym: [D. schets, fr. It. schizzo a sketch, a splash (whence also F. esquisse; cf. Esquisse.); cf. It. schizzare to splash, to sketch.]

Defn: An outline or general delineation of anything; a first rough or incomplete draught or plan of any design; especially, in the fine arts, such a representation of an object or scene as serves the artist’s purpose by recording its chief features; also, a preliminary study for an original work.

Syn.
 -- Outline; delineation; draught; plan; design.
 -- Sketch, Outline, Delineation. An outline gives only the bounding lines of some scene or picture. A sketch fills up the outline in part, giving broad touches, by which an imperfect idea may be conveyed. A delineation goes further, carrying out the more striking features of the picture, and going so much into detail as to furnish a clear conception of the whole. Figuratively, we may speak of the outlines of a plan, of a work, of a project, etc., which serve as a basis on which the subordinate parts are formed, or of sketches of countries, characters, manners, etc., which give us a general idea of the things described. Crabb.

SKETCH
Sketch, v. t. [imp. & p. p. Sketched; p. pr. & vb. n. Sketching.]
Etym: [Cf D. schetsen, It. schizzare. See Sketch, n.]

1. To draw the outline or chief features of; to make a rought of.

2. To plan or describe by giving the principal points or ideas of.

Syn.
-- Dexterity; adroitness; expertness; art; aptitude; ability.
-- Skill, Dexterity, Adroitness. Skill is more intelligent, denoting familiar knowledge united to readiness of performance. Dexterity, when applied to the body, is more mechanical, and refers to habitual ease of execution. Adroitness involves the same image with dexterity, and differs from it as implaying a general facility of movement (especially in avoidance of danger or in escaping from a difficalty). The same distinctions apply to the figurative sense of the words. A man is skillful in any employment when he understands both its theory and its practice. He is dexterous when he maneuvers with great lightness. He is adroit in the use od quick, sudden, and well-directed movements of the body or the mind, so as to effect the object he has in view.

Soap, n. Etym: [OE. sope, AS. sape; akin to D. zeep, G. seife, OHG. seifa, Icel. sapa, Sw. s, Dan. s, and perhaps to AS. sipan to drip, MHG. sifen, and L. sebum tallow. Cf. Saponaceous.]

Defn: A substance which dissolves in water, thus forming a lather, and is used as a cleansing agent. Soap is produced by combining fats or oils with alkalies or alkaline earths, usually by boiling, and consists of salts of sodium, potassium, etc., with the fatty acids (oleic, stearic, palmitic, etc.). See the Note below, and cf. Saponification. By extension, any compound of similar composition or properties, whether used as a cleaning agent or not.

Note: In general, soaps are of two classes, hard and soft. Calcium, magnesium, lead, etc., form soaps, but they are insoluble and useless.
The purifying action of soap depends upon the fact that it is decomposed by a large quantity of water into free alkali and an insoluble acid salt. The first of these takes away the fatty dirt on washing, and the latter forms the soap lather which envelops the greasy matter and thus tends to remove it. Roscoe & Schorlemmer.
Castile soap, a fine-grained hard soap, white or mottled, made of olive oil and soda; -- called also Marseilles, or Venetian, soap.
 -- Hard soap, any one of a great variety of soaps, of different ingredients and color, which are hard and compact. All solid soaps are of this class.

-- Soap cerate, a cerate formed of soap, olive oil, white wax, and the subacetate of lead, sometimes used as an application to allay inflammation.
-- Soap fat, the refuse fat of kitchens, slaughter houses, etc., used in making soap.
-- Soap liniment (Med.), a liniment containing soap, camphor, and alcohol.
-- Soap nut, the hard kernel or seed of the fruit of the soapberry tree, -- used for making beads, buttons, etc.
-- Soap plant (Bot.), one of several plants used in the place of soap, as the Chlorogalum pomeridianum, a California plant, the bulb of which, when stripped of its husk and rubbed on wet clothes, makes a thick lather, and smells not unlike new brown soap. It is called also soap apple, soap bulb, and soap weed.
-- Soap tree. (Bot.) Same as Soapberry tree.
-- Soda soap, a soap containing a sodium salt. The soda soaps are all hard soaps.
-- Soft soap, a soap of a gray or brownish yellow color, and of a slimy, jellylike consistence, made from potash or the lye from wood ashes. It is strongly alkaline and often contains glycerin, and is used in scouring wood, in cleansing linen, in dyehouses, etc. Figuratively, flattery; wheedling; blarney. [Colloq.] -- Toilet soap, hard soap for the toilet, usually colored and perfumed.

Defn: To become solid; to harden.

SOLIDISM
Sol"id*ism, n. (Med.)

Defn: The doctrine that refers all diseases to morbid changes of the solid parts of the body. It rests on the view that the solids alone are endowed with vital properties, and can receive the impression of agents tending to produce disease.

SOLIDIST
Sol"id*ist, n. (Med.)

Defn: An advocate of, or believer in, solidism. Dunglison.

SOLIDITY
So*lid"i*ty, n. Etym: [L. soliditas: cf. F. solidité.]

1. The state or quality of being solid; density; consistency, -- opposed to fluidity; compactness; fullness of matter, -- opposed to openness or hollowness; strength; soundness, -- opposed to weakness or instability; the primary quality or affection of matter by which its particles exclude or resist all others; hardness; massiveness.
That which hinders the approach of two bodies when they are moving one toward another, I call solidity. Locke.

2. Moral firmness; soundness; strength; validity; truth; certainty; -- as opposed to weakness or fallaciousness; as, the solidity of arguments or reasoning; the solidity of principles, triuths, or opinions.

3. (Geom.)

Defn: The solid contents of a body; volume; amount of inclosed space.

Syn.
 -- Firmness; solidness; hardness; density; compactness; strength;
soundness; validity; certainty.

SOLIDLY
Sol"id*ly, adv.

Defn: In a solid manner; densely; compactly; firmly; truly.

SOLIDNESS
Sol"id*ness, n.

1. State or quality of being solid; firmness; compactness; solidity, as of material bodies.

2. Soundness; strength; truth; validity, as of arguments, reasons, principles, and the like.

SOLIDUNGULA
Sol'id*un"gu*la, n. pl. Etym: [NL., from L. solidus solid + ungula a hoof.] (Zoöl.)

Defn: A tribe of ungulates which includes the horse, ass, and related species, constituting the family Equidæ.

SOLIDUNGULAR
Sol'id*un"gu*lar, a. (Zoöl.)

Defn: Solipedous.

SOLIDUNGULATE
Sol'id*un"gu*late, n. Etym: [Solid + ungulate.] (Zool.)

Defn: Same as Soliped.

SOLIDUNGULOUS
Sol'id*un"gu*lous, a. (Zoöl.)

Defn: Solipedous.

SOLIFIDIAN
Sol'i*fid"i*an, n. Etym: [L. solus alone + fides faith.] (Eccl.)

Defn: One who maintains that faith alone, without works, is sufficient for justification; -- opposed to nullifidian. Hammond.

SOLIFIDIAN
Sol'i*fid"i*an, a.

Defn: Holding the tenets of Solifidians; of or pertaining to the solifidians.

SOLIFIDIANISM
Sol'i*fid"i*an*ism, n.

Defn: The state of Solifidians.

SOLIFORM
Sol"i*form, a. Etym: [L. sol sun + -form.]

Defn: Like the sun in form, appearance, or nature; resembling the sun. [R.] "Soliform things." Cudworth.

SOLIFUGAE
So*lif"u*gæ, n. pl. Etym: [NL., from L. solifuga (better solipuga), a kind of venomous ant, or spider.] (Zoöl.)

Defn: A division of arachnids having large, powerful fangs and a segmented abdomen; -- called also Solpugidea, and Solpugides.

SOLILOQUIZE
So*lil"o*quize, v. i. [imp. & p. p. Soliloquized; p. pr. & vb. n. Soliloquizing.]

Defn: To utter a soliloquy; to talk to one's self.

SOLILOQUY
So*lil"o*quy, n.; pl. Soliloquies. Etym: [L. soliloquium; solus alone + loqui to speak. See Sole ly, and Loquacious.]

1. The act of talking to one's self; a discourse made by one in solitude to one's self; monologue.
Lovers are always allowed the comfort of soliloquy. Spectator.

2. A written composition, reciting what it is supposed a person says to himself.
The whole poem is a soliloquy. Prior.

SOLIPED
Sol"i*ped, n. Etym: [Cf. F. solipède, It. solipede, Sp. solipedo; apparently fr. L. solus alone + pes, pedis, a foot; but probably fr. L. solidipes solid-footed, whole-hoofed. See Solid, and Pedal.] (Zoöl.)

Defn: A mammal having a single hoof on each foot, as the horses and asses; a solidungulate. [Written also solipede.]
The solipeds, or firm-hoofed animals, as horses, asses, and mules, etc., -- they are, also, in mighty number. Sir T. Browne.

SOLIPEDOUS
So*lip"e*dous, a.

Defn: Having single hoofs.

Diamond solitaires blazing on his breast and wrists. Mrs. R. H. Davis.

3. A game which one person can play alone; -- applied to many games of cards, etc.; also, to a game played on a board with pegs or balls, in which the object is, beginning with all the places filled except one, to remove all but one of the pieces by "jumping," as in draughts.

4. (Zoöl.)
(a) A large extinct bird (Pezophaps solitaria) which formerly inhabited the islands of Mauritius and Rodrigeuz. It was larger and taller than the wild turkey. Its wings were too small for flight. Called also solitary.
(b) Any species of American thrushlike birds of the genus Myadestes. They are noted their sweet songs and retiring habits. Called also fly-catching thrush. A West Indian species (Myadestes sibilans) is called the invisible bird.

SOLITARIAN
Sol‘i*ta"ri*an, n. Etym: [See Solitary.]

Defn: A hermit; a solitary. [Obs.] Sir R. Twisden.

SOLITARIETY
Sol‘i*ta*ri"e*ty, n.

Defn: The state of being solitary; solitariness. [Obs.] Cudworth.

SOLITARILY
Sol"i*ta*ri*ly, adv.

Defn: In a solitary manner; in solitude; alone. Mic. vii. 14.

SOLITARINESS
Sol"i*ta*ri*ness, n.

Defn: Condition of being solitary.

SOLITARY
Sol"i*ta*ry, a. Etym: [L. solitarius, fr. solus alone: cf. F. solitaire. See Sole, a., and cf. Solitaire.]

1. Living or being by one’s self; having no companion present; being without associates; single; alone; lonely.
Those rare and solitary, these in flocks. Milton.
Hie home unto my chamber, Where thou shalt find me, sad and solitary. Shak.

2. Performed, passed, or endured alone; as, a solitary journey; a solitary life.
Satan . . . explores his solitary flight. Milton.

3. ot much visited or frequented remote from society; retired; lonely; as, a solitary residence or place.

4. Not inhabited or occupied; without signs of inhabitants or

occupation; desolate; deserted; silent; still; hence, gloomy; dismal; as, the solitary desert.
How doth the city sit solitary, that was full of people. Lam. i. 1.
Let that night be solitary; let no joyful voice come therein. Job iii. 7.

5. Single; individual; sole; as, a solitary instance of vengeance; a solitary example.

6. (Bot.)

Defn: Not associated with others of the same kind. Solitary ant (Zoöl.), any solitary hymenopterous insect of the family Mutillidæ. The female of these insects is destitute of wings and has a powerful sting. The male is winged and resembles a wasp. Called also spider ant.
 -- Solitary bee (Zoöl.), any species of bee which does not form communities.
 -- Solitary sandpiper (Zoöl.), an American tattler (Totanus solitarius).
 -- Solitary snipe (Zoöl.), the great snipe. [Prov. Eng.] -- Solitary thrush (Zoöl.) the starling. [Prov. Eng.]

SOLITARY
Sol"i*ta*ry, n.

Defn: One who lives alone, or in solitude; an anchoret; a hermit; a recluse.

SOLITUDE
Sol"i*tude, n. Etym: [F., from L. solitudo, solus alone. See Sole, a.]

1. state of being alone, or withdrawn from society; a lonely life; loneliness.
Whosoever is delighted with solitude is either a wild beast or a god. Bacon.
O Solitude! where are the charms That sages have seen in thy face Cowper.

2. Remoteness from society; destitution of company; seclusion; -- said of places; as, the solitude of a wood.
The solitude of his little parish is become matter of great comfort to him. Law.

3. solitary or lonely place; a desert or wilderness.
In these deep solitudes and awful cells Where heavenly pensive contemplation dwells. Pope.

Syn. Loneliness; soitariness; loneness; retiredness; recluseness.
 -- Solitude, Retirement, Seclusion, Loneliness. Retirement is a withdrawal from general society, implying that a person has been engaged in its scenes. Solitude describes the fact that a person is alone; seclusion, that he is shut out from others, usually by his own choice; loneliness, that he feels the pain and oppression of being alone. Hence, retirement is opposed to a gay, active, or public life; solitude, to society; seclusion, to freedom of access on the part of others; and loneliness, enjoyment of that society which the heart demands.
O blest retirement, friend to life’s decline. Goldsmith.
Such only can enjoy the country who are capable of thinking when they are there; then they are prepared for solitude; and in that [the country] solitude is prepared for them. Dryden.

It is a place of seclusion from the external world. Bp. Horsley.
These evils . . . seem likely to reduce it [a city] ere long to the loneliness and the insignificance of a village. Eustace.

SOLIVAGANT
So*liv"a*gant, a. Etym: [L. solus alone + vagans wandering.]

Defn: Wandering alone. [R.] T. Grander.

SOLIVAGOUS
So*liv"a*gous, a. Etym: [L. solivagus.]

Defn: Solivagant.

SOLLAR
Sol"lar, n.

1. See Solar, n. [Obs.]

2. (Mining)

Defn: A platform in a shaft, especially one of those between the series of ladders in a shaft.

SOLLAR
Sol"lar, v. t.

Defn: To cover, or provide with, a sollar.

SOLLEIN
Sol"lein, a.

Defn: Sullen; sad. [Obs.] Spenser.

SOLLERET
Sol*ler*et", n. Etym: [F. soleretim. fr. OF. soler shoe.]

Defn: A flexible steel shoe (or one of the plates forming such a shoe), worn with mediæval armor.

SOLMIZATION
Sol'mi*za"tion, n. Etym: [F. solmisation, fr. solmiser to sol-fa; -- called from the musical notes sol, mi. See Sol-fa.] (Mus.)

Defn: The act of sol-faing. [Written also solmisation.]

Note: This art was practiced by the Greeks; but six of the seven syllables now in use are generally attributed to Guido d' Arezzo, an Italian monk of the eleventh century, who is said to have taken them from the first syllables of the first six lines of the following stanza of a monkish hymn to St. John the Baptist. --
Ut queant laxis Resonare fibris Mira gestorum Famuli tuorum Solve polluti Labii reatum, Sancte Joannes. Professor Skeat says the name of the seventh note, si, was also formed by him [Guido] from the initials of the two words of the last line; but this is disputed, Littré attributing the first use of it to Anselm of Flanders long afterwards. The syllable do is often substituted for ut.

SOLO
So"lo, n.; pl. E. Solos, It. Soli. Etym: [It., from L. solus alone. See Sole, a.] (Mus.)

Defn: A tune, air, strain, or a whole piece, played by a single person on an instrument, or sung by a single voice.

SOLOIST
So"lo*ist, n. (Mus.)

Defn: One who sings or plays a solo.

SOLOMON
Sol"o*mon, n.

Defn: One of the kings of Israel, noted for his superior wisdom and magnificent reign; hence, a very wise man.
-- Sol‘o*mon"ic, a. Solomon’s seal (Bot.), a perennial liliaceous plant of the genus Polygonatum, having simple erect or curving stems rising from thick and knotted rootstocks, and with white or greenish nodding flowers. The commonest European species is Polygonatum multiflorum. P. biflorum and P. giganteum are common in the Eastern United States. See Illust. of Rootstock. False Solomon’s seal (Bot.), any plant of the liliaceous genus Smilacina having small whitish flowers in terminal racemes or panicles.

SOLOMON’S SEAL
Sol"o*mon’s seal.

Defn: A mystic symbol consisting of two interlaced triangles forming a star with six points, often with one triangle dark and one light, symbolic of the union of soul and body.

SOLON
So"lon, n.

Defn: A celebrated Athenian lawmaker, born about 638 b. c.; hence, a legislator; a publicist; -- often used ironically.

SOLO WHIST
Solo whist.

Defn: A card game played with the full pack ranking as at whist, each player declaring for which of seven different points he proposes to play.

SOLPUGID
Sol*pu"gid, a. (Zoöl.)

Defn: Of or pertaining to the Solifugæ.
-- n.

Defn: One of the Solifugæ.

SOLPUGIDEA
Sol‘pu*gid"e*a, n. pl. Etym: [NL. See Solifugæ.] (Zoöl.)

Defn: Same as Solifugæ.

SOLSTICE
Sol"stice, n.Etym: [L. solstitium; sol the sun + sistere to cause to stand, akin to stare to stand: cf. F. solstice. See Solar, a., Stand, v. i.]

1. A stopping or standing still of the sun. [Obs.] Sir T. Browne.

2. (Astron.)
(a) The point in the ecliptic at which the sun is farthest from the

equator, north or south, namely, the first point of the sign Cancer and the first point of the sign Capricorn, the former being the summer solstice, latter the winter solstice, in northern latitudes; -- so called because the sun then apparently stands still in its northward or southward motion.
(b) The time of the sun’s passing the solstices, or solstitial points, namely, about June 21 and December 21. See Illust. in Appendix.

SOLSTITIAL
Sol*sti"tial, a. Etym: [L. solstitialis: cf. F. solsticial.]

1. Of or pertaining to a solstice.

2. Happening at a solstice; esp. (with reference to the northern hemisphere), happening at the summer solstice, or midsummer. "Solstitial summer’s heat." Milton.

SOLUBILITY
Sol‘u*bil"i*ty, n. Etym: [Cf. F. solubilité.]

1. The quality, condition, or degree of being soluble or solvable; as, the solubility of a salt; the solubility of a problem or intricate difficulty.

2. (Bot.)

Defn: The tendency to separate readily into parts by spurious articulations, as the pods of tick trefoil.

SOLUBLE
Sol"u*ble, a. Etym: [L. solubilis, fr. solvere, solutum, to loosen, to dissolve: cf. F. soluble. See Solve, and cf. Solvable.]

1. Susceptible of being dissolved in a fluid; capable of solution; as, some substances are soluble in alcohol which are not soluble in water.
Sugar is . . . soluble in water and fusible in fire. Arbuthnot.

2. Susceptible of being solved; as, a soluble algebraic problem; susceptible of being disentangled, unraveled, or explained; as, the mystery is perhaps soluble. "More soluble is this knot." Tennyson.

3. Relaxed; open or readily opened. [R.] "The bowels must be kept soluble." Dunglison. Soluble glass. (Chem.) See under Glass.

SOLUBLENESS
Sol"u*ble*ness, n.

Defn: Quality or state of being soluble.

SOLUS; SOLA
So"lus, masc. a., So"la, fem. a. Etym: [L.]

Defn: Alone; -- chiefly used in stage directions, and the like.

SOLUTE
So*lute", a. Etym: [L. solutus, p.p. of solvere to loosen. See Solve.]

1. Loose; free; liberal; as, a solute interpretation. [Obs.] Bacon.

2. Relaxed; hence; merry; cheerful. [R.]

A brow solute, and ever-laughing eye. Young.

3. Soluble; as, a solute salt. [Obs.]

4. (Bot.)

Defn: Not adhering; loose; -- opposed to adnate; as, a solute stipule.

SOLUTE
So*lute", v. t.

1. To dissolve; to resolve. [Obs.]

2. To absolve; as, to solute sin. [Obs.] Bale.

SOLUTION
So*lu"tion, n. Etym: [OE. solucion, OF. solucion, F. solution, fr. L. solutio, fr. solvere, solutum, to loosen, dissolve. See Solve.]

1. The act of separating the parts of any body, or the condition of undergoing a separation of parts; disruption; breach.
In all bodies there is an appetite of union and evitation of solution of continuity. Bacon.

2. The act of solving, or the state of being solved; the disentanglement of any intricate problem or difficult question; explanation; clearing up; -- used especially in mathematics, either of the process of solving an equation or problem, or the result of the process.

3. The state of being dissolved or disintegrated; resolution; disintegration.
It is unquestionably an enterprise of more promise to assail the nations in their hour of faintness and solution, than at a time when magnificent and seductive systems of worship were at their height of energy and splendor. I. Taylor.

4. (Chem.Phys.)

Defn: The act or process by which a body (whether solid, liquid, or gaseous) is absorbed into a liquid, and, remaining or becoming fluid, is diffused throughout the solvent; also, the product reulting from such absorption.

Note: When a solvent will not take in any more of a substance the solution is said to be saturated. Solution is two kinds; viz.: (a) Mechanical solution, in which no marked chemical change takes place, and in which, in the case of solids, teh dissolved body can be regained by evaporation, as in the solution of salt or sugar in water. (b) Chemical solution, in which there is involved a decided chemical change, as when limestone or zinc undergoes solution in hydrochloric acid. Mechanical solution is regarded as a form of molecular or atomic attraction, and is probably occasioned by the formation of certain very weak and unstable compounds which are easily dissociated and pass into new and similar compounds.

Note: This word is not used in chemistry or mineralogy for fusion, or the melting of bodies by the heat of fire.

5. release; deliverance; disharge. [Obs.] Barrow.

6. (Med.)

(a) The termination of a disease; resolution.
(b) A crisis.
(c) A liquid medicine or preparation (usually aqueous) in which the solid ingredients are wholly soluble. U. S. Disp. Fehling's solution (Chem.), a standardized solution of cupric hydrate in sodium potassium tartrate, used as a means of determining the reducing power of certain sugars and sirups by the amount of red cuprous oxide thrown down.
-- Heavy solution (Min.), a liquid of high density, as a solution of mercuric iodide in potassium iodide (called the Sonstadt or Thoulet solution) having a maximum specific gravity of 3.2, or of borotungstate of cadium (Klein solution, specific gravity 3.6), and the like. Such solutions are much used in determining the specific gravities of minerals, and in separating them when mechanically mixed as in a pulverized rock.
-- Nessler's solution. See Nesslerize.
-- Solution of continuity, the separation of connection, or of connected substances or parts; -- applied, in surgery, to a facture, laceration, or the like. "As in the natural body a wound, or solution of continuity, is worse than a corrupt humor, so in the spiritual." Bacon.
-- Standardized solution (Chem.), a solution which is used as a reagent, and is of a known and standard strength; specifically, a normal solution, containing in each cubic centimeter as many milligrams of the element in question as the number representing its atomic weight; thus, a normal solution of silver nitrate would contain 107.7 mgr. of silver nitrate in each cubic centimeter.

SOLUTIVE
Sol"u*tive, a. Etym: [Cf. F. solutif.]

Defn: Tending to dissolve; loosening; laxative. Bacon.

SOLVABILITY
Solv'a*bil"i*ty, n. Etym: [F. solvabilité.]

1. The quality or state of being solvable; as, the solvability of a difficulty; the solvability of a problem.

2. The condition of being solvent; ability to pay all just debts; solvency; as, the solvability of a merchant.

SOLVABLE
Solv"a*ble, a. Etym: [F. solvable. See Solve, and cf. Soluble, Solvible.]

1. Susceptible of being solved, resolved, or explained; admitting of solution.

2. Capable of being paid and discharged; as, solvable obligations. Tooke.

3. Able to pay one's debts; solvent. [Obs.] Fuller.

SOLVABLENESS
Solv"a*ble*ness, n.

Defn: Quality of being solvable.

SOLVE
Solve, v. t. [imp. & p. p. Solved; p. pr. & vb. n. Solving.] Etym: [L. solvere, solutum; from a prefix so- expressing separation (cf. Sober) + luere to loosen; cf. OF. soldre, soudre. See Loose, and cf.

Absolve.]

Defn: To explain; to resolve; to unfold; to clear up out to a result or conclusion; as, to solve a doubt; to solve difficulties; to solve a problem.
True piety would effectually solve such scruples. South.
God shall solve the dark decrees of fate. Tickell.

Syn.
-- To explain; resolve; unfold; clear up.

SOLVE
Solve, n.

Defn: A solution; an explanation. [Obs.] Shak.

SOLVENCY
Sol"ven*cy, n. Etym: [See Solvent.]

Defn: The quality or state of being solvent.

SOLVEND
Sol"vend, n. Etym: [L. solvendus to be loosened or dissolved, fr. solvere. See Solution.]

Defn: A substance to be dissolved. [R.]

SOLVENT
Sol"vent, a. Etym: [L. solvens, p.pr. of solvere. See Solvable.]

1. Having the power of dissolving; dissolving; as, a solvent fluid. "the solvent body." Boyle.

2. Able or sufficient to pay all just debts; as, a solvent merchant; the estate is solvent.

SOLVENT
Sol"vent, n. (Chem.)

Defn: A substance (usually liquid) suitable for, or employed in, solution, or in dissolving something; as, water is the appropriate solvent of most salts, alcohol of resins, ether of fats, and mercury or acids of metal, etc.

2. That which resolves; as, a solvent of mystery.

SOLVER
Sol"ver, n.

Defn: One who, or that which, solves.

SOLVIBLE
Solv"i*ble, a.

Defn: See Solvable.

SOLY
Sol"y, adv.

Defn: Solely. [Obs.] Spenser.

SOMA
So"ma, n. Etym: [NL., fr. Gr. (Anat.)

Defn: The whole axial portion of an animal, including the head, neck, trunk, and tail. B. G. Wilder.

SOMAJ; SAMAJ
So"maj", Sa*maj", n.

Defn: A society; a congregation; a worshiping assembly, or church, esp. of the Brahmo-somaj. [India]

SOMALI; SOMAL
So*ma"li, So*mal", n. (Ethnol.)

Defn: A Hamitic people of East Central Africa.

SOMATIC
So*mat"ic, a. Etym: [Gr.

1. Of or pertaining to the body as a whole; corporeal; as, somatic death; somatic changes.

2. Of or pertaining to the wall of the body; somatopleuric; parietal; as, the somatic stalk of the yolk sac of an embryo. Somatic death. See the Note under Death, n., 1.

SOMATICAL
So*mat"ic*al, a.

Defn: Somatic.

SOMATICS
So*mat"ics, n.

Defn: The science which treats of the general properties of matter; somatology.

SOMATIST
So"ma*tist, n.

Defn: One who admits the existence of material beings only; a materialist. Glanvill.

SOMATOCYST
So"ma*to*cyst, n. Etym: [Gr. (Zoöl.)

Defn: A cavity in the primary nectocalyx of certain Siphonophora. See Illust. under Nectocalyx.

SOMATOLOGY
So‘ma*tol"o*gy, n. Etym: [Gr. -logy.]

1. The dictrine or the science of the general properties of material substances; somatics.

2. A treatise on the human body; anatomy. Dunglison.

SOMATOME
So"ma*tome, n. Etym: [Gr. (Anat. & (Zoöl.)

Defn: See Somite.

SOMATOPLEURE
So"ma*to*pleure, n. Etym: [Gr. (Anat.)

Defn: The outer, or parietal, one of the two lamellæ into which the vertebrate blastoderm divides on either side of the notochord, and from which the walls of the body and the amnion are developed. See Splanchopleure.

SOMATOPLEURIC
So'ma*to*pleu"ric, a. (Anat.)

Defn: of or pertaining to the somatopleure.

SOMATOTROPISM
So'ma*tot"ro*pism, n. Etym: [Gr. (Physiol.)

Defn: A directive influence exercised by a mass of matter upon growing organs. Encyc. Brit.

SOMBER; SOMBRE
Som"ber, Som"bre, a. Etym: [F. sombre; cf. Sp. sombra, shade, prob. from LL. subumbrare to put in the shade; L. sub under + umbra shade. See Umbrage.]

1. Dull; dusky; somewhat dark; gloomy; as, a somber forest; a somber house.

2. Melancholy; sad; grave; depressing; as, a somber person; somber reflections.
The dinner was silent and somber; happily it was also short.
Beaconsfield.

SOMBER; SOMBRE
Som"ber, Som"bre, v. t.

Defn: To make somber, or dark; to make shady. [R.]

SOMBER; SOMBRE
Som"ber, Som"bre, n.

Defn: Gloom; obscurity; duskiness; somberness. [Obs.]

SOMBERLY; SOMBRELY
Som"ber*ly, Som"bre*ly, adv.

Defn: In a somber manner; sombrously; gloomily; despondingly.

SOMBERNESS; SOMBRENESS
Som"ber*ness, Som"bre*ness, n.

Defn: The quality or state of being somber; gloominess.

SOMBRERO
Som*bre"ro, n. Etym: [Sp., from sombra shade. See Sombre.]

Defn: A kind of broad-brimmed hat, worn in Spain and in Spanish America. Marryat.

SOMBROUS
Som"brous, a. Etym: [Cf. Sp. sombroso.]

Defn: Gloomy; somber. "Tall and sombrous pines." Longfellow.
 -- Som"brous*ly, adv.
 -- Som"brous*ness, n.

-SOME
-some (-som).

Defn: A combining form or suffix from Gr. sw^ma (gen. sw'matos) the body; as in merosome, a body segment; cephalosome, etc.

-SOME
-some (-sûm). Etym: [AS. -sum; akin to G. & OHG. -sam, Icel. samr, Goth. lustusams longed for. See Same, a., and cf. Some, a.]

Defn: An adjective suffix having primarily the sense of like or same, and indicating a considerable degree of the thing or quality denoted in the first part of the compound; as in mettlesome, full of mettle or spirit; gladsome, full of gladness; winsome, blithesome, etc.

SOME
Some, a. Etym: [OE. som, sum, AS. sum; akin to OS., OFries., & OHG. sum, OD. som, D. sommig, Icel. sumr, Dan. somme (pl.), Sw. somlige (pl.), Goth. sums, and E. same. sq. root191. See Same, a., and cf. -some.]

1. Consisting of a greater or less portion or sum; composed of a quantity or number which is not stated; -- used to express an indefinite quantity or number; as, some wine; some water; some persons. Used also pronominally; as, I have some.
Some theoretical writers allege that there was a time when there was no such thing as society. Blackstone.

2. A certain; one; -- indicating a person, thing, event, etc., as not known individually, or designated more specifically; as, some man, that is, some one man. "Some brighter clime." Mrs. Barbauld.

Defn: The science of spectrum analysis in any or all of its relations and applications.

SPECTROMETER
Spec*trom"e*ter, n. Etym: [Spectrum + -meter.] (Physics)

Defn: A spectroscope fitted for measurements of the luminious spectra observed with it.

SPECTROMETRY
Spec*trom"e*try, n. (Physics)

Defn: Art or process of using the spectrometer, or of measuring wave lengths of rays of a spectrum. -- Spec'tro*met"ric (#), a.

SPECTROPHONE
Spec"tro*phone, n. [Spectrum + Gr. sound.]

Defn: An instrument constructed on the principle of the photophone and used in spectrum analysis as an adjunct to the spectroscope. -- Spec'tro*phon"ic (#), a.

SPECTROPHOTOMETER
Spec'tro*pho*tom"e*ter, n. Etym: [Spectrum + photometer.] (Opt.)

Defn: An instrument for measuring or comparing the intensites of the colors of the spectrum.

SPECTROPHOTOMETRY
Spec'tro*pho*tom"e*try, n.

Defn: The art of comparing, photometrically, the brightness of two spectra, wave length by wave length; the use of the spectrophotometer. --Spec'tro*pho'to*met"ric (#), a.

SPECTROSCOPE
Spec"tro*scope, n. Etym: [Spectrum + -scope.] (Physics)

Defn: An optical instrument for forming and examining spectra (as that of solar light, or those produced by flames in which different substances are volatilized), so as to determine, from the position of the spectral lines, the composition of the substance.

SPECTROSCOPIC; SPECTROSCOPICAL
Spec'tro*scop"ic, Spec'tro*scop"ic*al, a.

Defn: Of or pertaining to a spectroscope, or spectroscopy.
-- Spec´tro*scop"ic*al*ly, adv.

SPECTROSCOPIST
Spec*tros"co*pist ( or ), n.

Defn: One who investigates by means of a spectroscope; one skilled in the use of the spectroscope.

SPECTROSCOPY
Spec*tros"co*py, n.

Defn: The use of the spectroscope; investigations made with the spectroscope.

SPECTRUM
Spec"trum, n.; pl. Spectra. Etym: [L. See Specter.]

1. An apparition; a specter. [Obs.]

2. (Opt.)
(a) The several colored and other rays of which light is composed, separated by the refraction of a prism or other means, and observed or studied either as spread out on a screen, by direct vision, by photography, or otherwise. See Illust. of Light, and Spectroscope.
(b) A luminous appearance, or an image seen after the eye has been exposed to an intense light or a strongly illuminated object. When the object is colored, the image appears of the complementary color, as a green image seen after viewing a red wafer lying on white paper. Called also ocular spectrum. Absorption spectrum, the spectrum of light which has passed through a medium capable of absorbing a portion of the rays. It is characterized by dark spaces, bands, or lines.
-- Chemical spectrum, a spectrum of rays considered solely with reference to their chemical effects, as in photography. These, in the usual photogrophic methods, have their maximum influence at and beyond the violet rays, but are not limited to this region.
-- Chromatic spectrum, the visible colored rays of the solar spectrum, exhibiting the seven principal colors in their order, and covering the central and larger portion of the space of the whole spectrum.
-- Continous spectrum, a spectrum not broken by bands or lines, but having the colors shaded into each other continously, as that from an incandescent solid or liquid, or a gas under high pressure.
-- Diffraction spectrum, a spectrum produced by diffraction, as by a grating.
-- Gaseous spectrum, the spectrum of an incandesoent gas or vapor, under moderate, or especially under very low, pressure. It is characterized by bright bands or lines.
-- Normal spectrum, a representation of a spectrum arranged upon conventional plan adopted as standard, especially a spectrum in which the colors are spaced proportionally to their wave lengths, as when formed by a diffraction grating.
-- Ocular spectrum. See Spectrum, 2 (b), above.
-- Prismatic spectrum, a spectrum produced by means of a prism.
-- Solar spectrum, the spectrum of solar light, especially as thrown upon a screen in a darkened room. It is characterized by numerous dark lines called Fraunhofer lines.
-- Spectrum analysis, chemical analysis effected by comparison of the different relative positions and qualities of the fixed lines of spectra produced by flames in which different substances are burned or evaporated, each substance having its own characteristic system of

lines.
 -- Thermal spectrum, a spectrum of rays considered solely with reference to their heating effect, especially of those rays which produce no luminous phenomena.

SPECULAR
Spec"u*lar, a. Etym: [L. specularis (cf., from the same root, specula a lookout, watchtower): cf. F. spéculaire. See Speculum.]

SPHERE
Sphere, n. Etym: [OE. spere, OF. espere, F. sphère, L. sphaera,. Gr.

1. (Geom.)

Defn: A body or space contained under a single surface, which in every part is equally distant from a point within called its center.

2. Hence, any globe or globular body, especially a celestial one, as the sun, a planet, or the earth.
Of celestial bodies, first the sun, A mighty sphere, he framed.
Milton.

3. (Astron.)
(a) The apparent surface of the heavens, which is assumed to be spherical and everywhere equally distant, in which the heavenly bodies appear to have their places, and on which the various astronomical circles, as of right ascension and declination, the equator, ecliptic, etc., are conceived to be drawn; an ideal geometrical sphere, with the astronomical and geographical circles in their proper positions on it.
(b) In ancient astronomy, one of the concentric and eccentric revolving spherical transparent shells in which the stars, sun, planets, and moon were supposed to be set, and by which they were carried, in such a manner as to produce their apparent motions.

4. (Logic)

Defn: The extension of a general conception, or the totality of the individuals or species to which it may be applied.

5. Circuit or range of action, knowledge, or influence; compass; province; employment; place of existence.
To be called into a huge sphere, and not to be seen to move in ’t.
Shak.
Taking her out of the ordinary relations with humanity, and inclosing her in a sphere by herself. Hawthorne.
Each in his hidden sphere of joy or woe Our hermit spirits dwell.
Keble.

6. Rank; order of society; social positions.

7. An orbit, as of a star; a socket. [R.] Shak. Armillary sphere, Crystalline sphere, Oblique sphere,. See under Armillary, Crystalline,.
 -- Doctrine of the sphere, applications of the principles of spherical trigonometry to the properties and relations of the circles of the sphere, and the problems connected with them, in astronomy and geography, as to the latitudes and longitudes, distance and bearing, of places on the earth, and the right ascension and declination, altitude and azimuth, rising and setting, etc., of the heavenly bodies; spherical geometry.
 -- Music of the spheres. See under Music.

Syn.
 -- Globe; orb; circle. See Globe.

SPHERE
Sphere, v. t. [imp. & p. p. Sphered; p. pr. & vb. n. Sphering.]

1. To place in a sphere, or among the spheres; to insphere.
The glorious planet Sol In noble eminence enthroned and sphered
Amidst the other. Shak.

2. To form into roundness; to make spherical, or spheral; to perfect.
Tennyson.

SPHERICAL; SPHERIC
Spher"ic*al, Spher"ic, a. Etym: [L. sphaericus, Gr. sphérique.]

1. Having the form of a sphere; like a sphere; globular; orbicular;

as, a spherical body.

2. Of or pertaining to a sphere.

3. Of or pertaining to the heavenly orbs, or to the sphere or spheres in which, according to ancient astronomy and astrology, they were set.
Knaves, thieves, and treachers by spherical predominance. Shak.
Though the stars were suns, and overburned Their spheric limitations. Mrs. Browning.
Spherical angle, Spherical coördinate, Spherical excess, etc. See under Angle, Coordinate, etc.
-- Spherical geometry, that branch of geometry which treats of spherical magnitudes; the doctrine of the sphere, especially of the circles described on its surface.
-- Spherical harmonic analysis. See under Harmonic, a.
-- Spherical lune,portion of the surface of a sphere included between two great semicircles having a common diameter.
-- Spherical opening, the magnitude of a solid angle. It is measured by the portion within the solid angle of the surface of any sphere whose center is the angular point.
-- Spherical polygon,portion of the surface of a sphere bounded by the arcs of three or more great circles.
-- Spherical projection, the projection of the circles of the sphere upon a plane. See Projection.
-- Spherical sector. See under Sector.
-- Spherical segment, the segment of a sphere. See under Segment.
-- Spherical triangle,re on the surface of a sphere, bounded by the arcs of three great circles which intersect each other.
-- Spherical trigonometry. See Trigonometry.
-- Spher"ic*al*ly, adv.
-- Spher"ic*al*ness, n.

SPHERICITY
Sphe*ric"i*ty, n. Etym: [Cf. F. sphéricité.]

Defn: The quality or state of being spherial; roundness; as, the sphericity of the planets, or of a drop of water.

SPHERICLE
Spher"i*cle, n.

Defn: A small sphere.

SPHERICS
Spher"ics, n. (Math.)

Defn: The doctrine of the sphere; the science of the properties and relations of the circles, figures, and other magnitudes of a sphere, produced by planes intersecting it; spherical geometry and trigonometry.

SPHEROBACTERIA
Sphe'ro*bac*te"ri*a, n. pl.; sing. Spherobacterium (. Etym: [NL. See Sphere, and Bacterium.] (Biol.)

Defn: See the Note under Microbacteria.

SPHEROCONIC
Sphe'ro*con"ic, n. (Geom.)

Defn: A nonplane curve formed by the intersection of the surface of an oblique cone with the surface of a sphere whose center is at the vertex of the cone.

SPHEROGRAPH
Spher"o*graph, n. Etym: [Sphere + -graph.]

Defn: An instrument for facilitating the practical use of spherics in navigation and astronomy, being constructed of two cardboards containing various circles, and turning upon each other in such a manner that any possible spherical triangle may be readily found, and the measures of the parts read off by inspection.

SPHEROID
Sphe"roid, n. Etym: [L. spheroides ball-like, spherical, Gr. sphéroïde.]

Defn: A body or figure approaching to a sphere, but not perfectly spherical; esp., a solid generated by the revolution of an ellipse about one of its axes. Oblate spheroid, Prolate spheroid. See Oblate, Prolate, and Ellipsoid.

SPHEROIDAL
Sphe*roid"al, a. Etym: [Cf. F. sphéroïdal.]

Defn: Having the form of a spheroid.
 -- Sphe*roid"al*ly, adv. Spheroidal state (Physics.), the state of a liquid, as water, when, on being thrown on a surface of highly heated metal, it rolls about in spheroidal drops or masses, at a temperature several degrees below ebullition, and without actual contact with the heated surface, -- a phenomenon due to the repulsive force of heat, the intervention of a cushion of nonconducting vapor, and the cooling effect of evaporation.

SPHEROIDIC; SPHEROIDICAL
Sphe*roid"ic, Sphe*roid"ic*al, a.

Defn: See Spheroidal. Cheyne.

SPHEROIDICITY; SPHEROIDITY
Sphe'roi*dic"i*ty, Sphe*roid"i*ty, n.

Defn: The quality or state of being spheroidal.

SPHEROMERE
Sphe"ro*mere, n. Etym: [Sphere + -mere.] (Zoöl.)

Defn: Any one of the several symmetrical segments arranged around the central axis and composing the body of a radiate anmal.

SPHEROMETER
Sphe*rom"e*ter, n. Etym: [Sphere + -meter: cf. F. sphéromètre.] (Physics)

Defn: An instrument for measuring the curvature of spherical surface, as of lenses for telescope, etc.

SPHEROSIDERITE
Spher'o*sid"er*ite, n. Etym: [Sphere + siderite.] (Min.)

Defn: Siderite occuring in spheroidal masses.

SPHEROSOME
Sphe"ro*some, n. Etym: [Sphere + -some body.] (Zoöl.)

Defn: The body wall of any radiate animal.

SPHERULATE
Spher"u*late, a.

Defn: Covered or set with spherules; having one or more rows of spherules, or minute tubercles.

SPHERULE
Spher"ule, n. Etym: [L. spherula: cf. F. sphérule.]

Defn: A little sphere or spherical body; as, quicksilver, when poured upon a plane, divides itself into a great number of minute spherules.

SPHERULITE
Spher"u*lite, n. Etym: [Cf. F. sphérulite.] (Min.)

Defn: A minute spherical crystalline body having a radiated structure, observed in some vitreous volcanic rocks, as obsidian and pearlstone.

SPHERULITIC
Spher'u*lit"ic, a.

Defn: Of or pertaining to a spherulite; characterized by the presence of spherulites.

SPHERY
Spher"y, a.

1. Round; spherical; starlike. [R.] "Hermia's sphery eyne." Shak.

2. Of or pertaining to the spheres. [R.]
She can teach ye how to climb Higher than the sphery chime. Milton.

SPHEX
Sphex, n.Etym: [NL., fr. Gr. (Zoöl.)

Defn: Any one of numerous species of sand wasps of the genus Sphex and allied genera. These wasps have the abdomen attached to the thorax by a slender pedicel. See Illust. of Sand wasp, under Sand. Sphex fly (Zoöl.), any one of numerous species of small dipterous flies of the genus Conops and allied genera. The form of the body is similar to that of a sphex.

SPHIGMOMETER
Sphig*mom"e*ter, n.

Defn: See Sphygmometer.

SPHINCTER
Sphinc"ter, n. Etym: [NL., fr. (Anat.)

Defn: A muscle which surrounds, and by its contraction tends to close, a natural opening; as, the sphincter of the bladder.

SPHINCTER
Sphinc"ter, a. (Anat.)

Defn: Of, pertaining to, or designating, a sphincter; as, a sphincter muscle.

SPHINGID

Sphin"gid, n. (Zoöl.)

Defn: A sphinx.

SPHINGID
Sphin"gid, a.

Defn: Of or pertaining to a sphinx, or the family Sphingidæ.

SPHINX
Sphinx, n. Etym: [L., from Gr. sfi‘gx, usually derived from sfi‘ggein to bind tight or together, as if the Throttler.]

4. (Zoöl.)

Defn: The Guinea, or sphinx, baboon (Cynocephalus sphinx). Sphinx baboon (Zoöl.), a large West African baboon (Cynocephalus sphinx), often kept in menageries.
 -- Sphinx moth. (Zoöl.) Same as Sphinx, 3.

SPHRAGIDE
Sphrag"ide, n.Etym: [L. sphragis, -idis, Lemnian earth, fr. Gr. (Min.)

Defn: Lemnian earth.

SPHRAGISTICS
Sphra*gis"tics, n. Etym: [Gr.

Defn: The science of seals, their history, age, distinctions, etc., esp. as verifying the age and genuiness of documents.

SPHRIGOSIS
Sphri*go"sis, n. Etym: [NL., fr. Gr. (Bot.)

Defn: A condition of vegetation in which there is too abundant growth of the stem and leaves, accompanied by deficiency of flowers and fruit.

SPHYGMIC
Sphyg"mic, a. Etym: [Gr. (Physiol.)

Defn: Of or pertaining to the pulse.

SPHYGMOGRAM
Sphyg"mo*gram, n. Etym: [Gr. -gram.] (Physiol.)

Defn: A tracing, called a pulse tracing, consisting of a series of curves corresponding with the beats of the heart, obtained by the application of the sphygmograph.

SPHYGMOGRAPH
Sphyg"mo*graph, n. Etym: [Gr. -graph.] (Physiol.)

Defn: An instrument which, when applied over an artery, indicates graphically the movements or character of the pulse. See Sphygmogram.

SPHYGMOGRAPHIC
Sphyg‘mo*graph"ic, a. (Phusiol.)

Defn: Relating to, or produced by, a sphygmograph; as, a sphygmographic tracing.

SPHYGMOMETER
Sphyg*mom"e*ter, n. Etym: [Gr. -meter.] (Physiol.)

Defn: An instrument for measuring the strength of the pulse beat; a sphygmograph.

SPHYGMOPHONE
Sphyg"mo*phone, n. Etym: [Gr. (Physiol.)

Defn: An electrical instrument for determining by the ear the rhythm of the pulse of a person at a distance.

SPHYGMOSCOPE
Sphyg"mo*scope, n. Etym: [Gr. -scope.] (Physiol.)

Defn: Same as Sphygmograph.

SPHYRAENOID
Sphy*ræ"noid, a.Etym: [L. sphyraena a kind of sea fish (Gr. sfy‘raina) + -oid.] (Zoöl.)

Defn: Of or pertaining to the Sphyrænidæ, a family of marine fishes including the barracudas.

SPIAL
Spi"al, n.

Defn: A spy; a scout. [Obs.] Bacon.

SPICA

(Zoöl.) Same as Solitary ant, under Solitary.
-- Spider crab (Zoöl.), any one of numerous species of maioid crabs having a more or less triangular body and ten long legs. Some of the species grow to great size, as the great Japanese spider crab (Macrocheira Kempferi), measuring sometimes more than fifteen feet across the legs when they are extended.
-- Spider fly (Zoöl.), any one of numerous species of parasitic dipterous insects of the family Hippoboscidæ. They are mostly destitute of wings, and live among the feathers of birds and the hair of bats. Called also bird tick, and bat tick.
-- Spider hunter (Zoöl.), any one of several species of East Indian sunbirds of the genus Arachnothera.
-- Spider lines, filaments of a spider’s web crossing the field of vision in optical instruments; -- used for determining the exact position of objects and making delicate measurements. Fine wires, silk fibers, or lines on glass similarly placed, are called spider lines.
-- Spider mite. (Zoöl.) (a) Any one of several species of parasitic mites of the genus Argas and allied genera. See Argas. (b) Any one of numerous small mites injurious to plants.
-- Spider monkey (Zoöl.), any one of numerous species of South American monkeys of the genus Ateles, having very long legs and a long prehensile tail.
-- Spider orchis (Bot.), a European orchidaceous plant (Ophrys aranifera), having flowers which resemble spiders.
-- Spider shell (Zoöl.), any shell of the genus Pteroceras. See Pteroceras.

SPIDERED
Spi"dered, a.

Defn: Infested by spiders; cobwebbed. Wolcott.

SPIDERLIKE
Spi"der*like‘, a.

Defn: Like a spider. Shak.

SPIDER STITCH

Spi"der stitch.

Defn: A stitch in lace making used to fill in open spaces with threads resembling a cobweb.

SPIDER WEB; SPIDER’S WEB
Spi"der web", or Spi"der’s web". (Zoöl.)

Defn: The silken web which is formed by most kinds of spiders, particularly the web spun to entrap their prey. See Geometric spider, Triangle spider, under Geometric, and Triangle.

SPIDERWORT
Spi"der*wort‘, n. (Bot.)

Defn: An American endogenous plant (Tradescantia Virginica), with long linear leaves and ephemeral blue flowers. The name is sometimes extended to other species of the same genus.

SPIED
Spied,

Defn: imp. & p. p. of Spy.

SPIEGELEISEN
Spie"gel*ei‘sen, n. Etym: [G. spiegel mirror + eisen iron.]

Defn: See Spiegel iron.

SPIEGEL IRON
Spie"gel i‘ron. Etym: [G. spiegel mirror + E. iron.] (Metal.)

Defn: A fusible white cast iron containing a large amount of carbon (from three and a half to six per cent) and some manganese. When the manganese reaches twenty-five per cent and upwards it has a granular structure, and constitutes the alloy ferro manganese, largely used in the manufacture of Bessemer steel. Called also specular pig iron, spiegel, and spiegeleisen.

SPIGHT
Spight, n. & v.

Defn: Spite. [Obs.] Spenser.

SPIGHT
Spight, n.

Defn: A woodpecker. See Speight. [Obs.]

SPIGNEL
Spig"nel, n. (Bot.)

Defn: Same as Spickenel.

SPIGNET
Spig"net, n. Etym: [Corrupted fr. spikenard.] (Bot.)

Defn: An aromatic plant of America. See Spikenard.

SPIGOT
Spig"ot, n. Etym: [From spick,or spike; cf. Ir. & Gael. spiocaid a spigot, Ir. spice a spike. See Spike.]

2. Constant in feeling, purpose, or pursuit; not fickle, changeable, or wavering; not easily moved or persuaded to alter a purpose; resolute; as, a man steady in his principles, in his purpose, or in the pursuit of an object.

3. Regular; constant; undeviating; uniform; as, the steady course of the sun; a steady breeze of wind.

Syn.
 -- Fixed; regular; uniform; undeviating; invariable; unremitted; stable. Steady rest (Mach), a rest in a turning lathe, to keep a long piece of work from trembling.

STEADY
Stead"y, v. t. [imp. & p. p. Steadied; p. pr. & vb. n. Steadying.]

Defn: To make steady; to hold or keep from shaking, reeling, or falling; to make or keep firm; to support; to make constant, regular, or resolute.

STEADY
Stead"y, v. i.

Defn: To become steady; to regain a steady position or state; to move steadily.
Without a breeze, without a tide, She steadies with upright keel. Coleridge.

STEAK
Steak, n. Etym: [OE. steike, Icel. steik, akin to Icel. steikja to roast, stikna to be roasted or scorched, and E. stick, the steak being broiled on a spit. See Stick, v. t.]

Defn: A slice of beef, broiled, or cut for broiling; -- also extended to the meat of other large animals; as, venison steak; bear steak; pork steak; turtle steak.

STEAL
Steal, n. Etym: [See Stale a handle.]

Defn: A handle; a stale, or stele. [Archaic or Prov. Eng.]
And in his hand a huge poleax did bear. Whose steale was iron-studded but not long. Spenser.

STEAL
Steal, v. t. [imp. Stole; p. p. Stolen; p. pr. & vb. n. Stealing.] Etym: [OE. stelen, AS. stelan; akin to OFries. stela, D. stelen, OHG. stelan, G. stehlen, Icel. stela, SW. stjäla, Dan. stiæle, Goth. stilan.]

1. To take and carry away, feloniously; to take without right or leave, and with intent to keep wrongfully; as, to steal the personal goods of another.
Maugre thy heed, thou must for indigence Or steal, or borrow, thy dispense. Chaucer.
The man who stole a goose and gave away the giblets in G. Eliot.

2. To withdraw or convey clandestinely (reflexive); hence, to creep furtively, or to insinuate.
They could insinuate and steal themselves under the same by their humble carriage and submission. Spenser.
He will steal himself into a man’s favor. Shak.

3. To gain by insinuating arts or covert means.
So Absalom stole the hearts of the men of Israel. 2 Sam. xv. 6.

4. To get into one’s power gradually and by imperceptible degrees; to take possession of by a gradual and imperceptible appropriation; -- with away.
Variety of objects has a tendency to steal away the mind from its steady pursuit of any subject. I. Watts.

5. To accomplish in a concealed or unobserved manner; to try to carry out secretly; as, to steal a look.
Always, when thou changest thine opinion or course, profess it plainly, . . . and do not think to steal it. Bacon.
To steal a march, to march in a covert way; to gain an advantage unobserved; -- formerly followed by of, but now by on or upon, and

sometimes by over; as, to steal a march upon one’s political rivals.
She yesterday wanted to steal a march of poor Liddy. Smollett.
Fifty thousand men can not easily steal a march over the sea.
Walpole.

Syn.
-- To filch; pilfer; purloin; thieve.

STEAL
Steal, v. i.

1. To practice, or be guilty of, theft; to commit larceny or theft.
Thou shalt not steal. Ex. xx. 15.

2. To withdraw, or pass privily; to slip in, along, or away, unperceived; to go or come furtively. Chaucer.
Fixed of mind to avoid further entreaty, and to fly all company, one night she stole away. Sir P. Sidney.
From whom you now must steal, and take no leave. Shak.
A soft and solemn breathing sound Rose like a steam of rich, distilled perfumes, And stole upon the air. Milton.

STEALER
Steal"er, n.

1. One who steals; a thief.

2. (Shipbuilding)

Defn: The endmost plank of a strake which stops short of the stem or stern.

STEALING
Steal"ing, n.

1. The act of taking feloniously the personal property of another without his consent and knowledge; theft; larceny.

2. That which is stolen; stolen property; -- chiefly used in the plural.

STEALINGLY
Steal"ing*ly, adv.

Defn: By stealing, or as by stealing, furtively, or by an invisible motion. Sir P. Sidney.

STEALTH
Stealth, n. Etym: [OE. staple. See Steal, v. t.]

1. The act of stealing; theft. [Obs.]
The owner proveth the stealth to have been committed upon him by such an outlaw. Spenser.

2. The thing stolen; stolen property. [Obs.] "Sluttish dens . . . serving to cover stealths." Sir W. Raleigh.

3. The bringing to pass anything in a secret or concealed manner; a secret procedure; a clandestine practice or action; -- in either a good or a bad sense.
Do good by stealth, and blush to find it fame. Pope.
The monarch, blinded with desire of wealth, With steel invades the brother’s life by stealth. Dryden.

I told him of your stealth unto this wood. Shak.

STEALTHFUL
Stealth"ful, a.

Defn: Given to stealth; stealthy. [Obs.] -- Stealth"ful*ly, adv. [Obs.] -- Stealth"ful*ness, n. [Obs.]

STEALTHILY
Stealth"i*ly, adv.

Defn: In a stealthy manner.

STEALTHINESS
Stealth"i*ness, n.

Defn: The state, quality, or character of being stealthy; stealth.

STEALTHLIKE
Stealth"like', a.

Defn: Stealthy; sly. Wordsworth.

STEALTHY
Stealth"y, a. [Compar. Stealthier; superl. Stealthiest.]

Defn: Done by stealth; accomplished clandestinely; unperceived; secret; furtive; sly.
[Withered murder] with his stealthy pace, . . . Moves like a ghost. Shak.

STEAM
Steam, n. Etym: [OE. stem, steem, vapor, flame, AS. steám vapor, smoke, odor; akin to D. stoom steam, perhaps originally, a pillar, or something rising like a pillar; cf. Gr. stand.]

1. The elastic, aëriform fluid into which water is converted when heated to the boiling points; water in the state of vapor.

2. The mist formed by condensed vapor; visible vapor; -- so called in popular usage.

3. Any exhalation. "A steam og rich, distilled perfumes." Milton. Dry steam, steam which does not contain water held in suspension mechanically; -- sometimes applied to superheated steam.
-- Exhaust steam. See under Exhaust.
-- High steam, or High-pressure steam, steam of which the pressure greatly exceeds that of the atmosphere.
-- Low steam, or Low-pressure steam, steam of which the pressure is less than, equal to, or not greatly above, that of the atmosphere.
-- Saturated steam, steam at the temperature of the boiling point which corresponds to its pressure; -- sometimes also applied to wet steam.
-- Superheated steam, steam heated to a temperature higher than the boiling point corresponding to its pressure. It can not exist in contact with water, nor contain water, and resembles a perfect gas; -- called also surcharged steam, anhydrous steam, and steam gas.
-- Wet steam, steam which contains water held in suspension mechanically; -- called also misty steam.

Note: Steam is often used adjectively, and in combination, to denote, produced by heat, or operated by power, derived from steam, in distinction from other sources of power; as in steam boiler or steam-boiler, steam dredger or steam-dredger, steam engine or steam-engine, steam heat, steam plow or steam-plow, etc. Steam blower. (a) A blower for producing a draught consisting of a jet or jets of steam in a chimney or under a fire. (b) A fan blower driven directly by a steam engine.

-- Steam boiler, a boiler for producing steam. See Boiler, 3, and Note. In the illustration, the shell a of the boiler is partly in section, showing the tubes, or flues, which the hot gases, from the fire beneath the boiler, enter, after traversing the outside of the shell, and through which the gases are led to the smoke pipe d, which delivers them to the chimney; b is the manhole; c the dome; e the steam pipe; f the feed and blow-off pipe; g the safety value; hthe water gauge.

-- Steam car, a car driven by steam power, or drawn by a locomotive.

-- Steam carriage, a carriage upon wheels moved on common roads by steam.

-- Steam casing. See Steam jacket, under Jacket.

-- Steam chest, the box or chamber from which steam is distributed to the cylinder of a steam engine, steam pump, etc., and which usually contains one or more values; -- called also valve chest, and valve box. See Illust. of Slide valve, under Slide.

-- Steam chimney, an annular chamber around the chimney of a boiler furnace, for drying steam.

-- Steam coil, a coil of pipe, or collection of connected pipes, for containing steam; -- used for heating, drying, etc.

-- Steam colors (Calico Printing), colors in which the chemical reaction fixed the coloring matter in the fiber is produced by steam.

-- Steam cylinder, the cylinder of a steam engine, which contains the piston. See Illust. of Slide valve, under Slide.

-- Steam dome (Steam Boilers), a chamber upon the top of the boiler, from which steam is conduced to the engine. See Illust. of Steam boiler, above.

-- Steam fire engine, a fire engine consisting of a steam boiler and engine, and pump which is driven by the engine, combined and mounted on wheels. It is usually drawn by horses, but is sometimes made self-propelling.

-- Steam fitter, a fitter of steam pipes.

-- Steam fitting, the act or the occupation of a steam fitter; also, a pipe fitting for steam pipes.

-- Steam gas. See Superheated steam, above.

-- Steam gauge, an instrument for indicating the pressure of the steam in a boiler. The mercurial steam gauge is a bent tube partially filled with mercury, one end of which is connected with the boiler while the other is open to the air, so that the steam by its pressure raises the mercury in the long limb of the tume to a height proportioned to that pressure. A more common form, especially for high pressures, consists of a spring pressed upon by the steam, and connected with the pointer of a dial. The spring may be a flattened, bent tube, closed at one end, which the entering steam tends to straighten, or it may be a diaphragm of elastic metal, or a mass of confined air, etc.

-- Steam gun, a machine or contrivance from which projectiles may be thrown by the elastic force of steam.

-- Steam hammer, a hammer for forging, which is worked directly by steam; especially, a hammer which is guided vertically and operated by a vertical steam cylinder located directly over an anvil. In the variety known as Nasmyth’s, the cylinder is fixed, and the hammer is attached to the piston rod. In that known as Condie’s, the piston is fixed, and the hammer attached to the lower end of the cylinder.

-- Steam heater. (a) A radiator heated by steam. (b) An apparatus consisting of a steam boiler, radiator, piping, and fixures for warming a house by steam.

-- Steam jacket. See under Jacket.

-- Steam packet, a packet or vessel propelled by steam, and running periodically between certain ports.
-- Steam pipe, any pipe for conveying steam; specifically, a pipe through which steam is supplied to an engine.
-- Steam plow or plough, a plow, or gang of plows, moved by a steam engine.
-- Steam port, an opening for steam to pass through, as from the steam chest into the cylinder.
-- Steam power, the force or energy of steam applied to produce results; power derived from a steam engine.
-- Steam propeller. See Propeller.
-- Steam pump, a small pumping engine operated by steam. It is usually direct-acting.
-- Steam room (Steam Boilers), the space in the boiler above the water level, and in the dome, which contains steam.
-- Steam table, a table on which are dishes heated by steam for keeping food warm in the carving room of a hotel, restaurant, etc.
-- Steam trap, a self-acting device by means of which water that accumulates in a pipe or vessel containing steam will be discharged without permitting steam to escape.
-- Steam tug, a steam vessel used in towing or propelling ships.
-- Steam vessel, a vessel propelled by steam; a steamboat or steamship; -- a steamer.
-- Steam whistle, an apparatus attached to a steam boiler, as of a locomotive, through which steam is rapidly discharged, producing a loud whistle which serves as a warning signal. The steam issues from a narrow annular orifice around the upper edge of the lower cup or hemisphere, striking the thin edge of the bell above it, and producing sound in the manner of an organ pipe or a common whistle.

STEAM
Steam, v. i. [imp. & p. p. Steamed; p. pr. & vb. n. Steaming.]

1. To emit steam or vapor.
My brother’s ghost hangs hovering there, O’er his warm blood, that steams into the air. Dryden.
Let the crude humors dance In heated brass, steaming with fire intence. J. Philips.

2. To rise in vapor; to issue, or pass off, as vapor.
The dissolved amber . . . steamed away into the air. Boyle.

3. To move or travel by the agency of steam.
The vessel steamed out of port. N. P. Willis.

4. To generate steam; as, the boiler steams well.

STEAM
Steam, v. t.

1. To exhale. [Obs.] Spenser.

2. To expose to the action of steam; to apply steam to for softening, dressing, or preparing; as, to steam wood; to steamcloth; to steam food, etc.

STEAMBOAT
Steam"boat‘, n.

Defn: A boat or vessel propelled by steam power; -- generally used of river or coasting craft, as distinguished from ocean steamers.

STEAMBOATING

Steam"boat‘ing, n.

1. The occupation or business of running a steamboat, or of transporting merchandise, passengers, etc., by steamboats.

2. (Bookbinding)

Defn: The shearing of a pile of books which are as yet uncovered, or out of boards. Knight.

STEAM ENGINE
Steam" en"gine.

Defn: An engine moved by steam.

Note: In its most common forms its essential parts are a piston, a cylinder, and a valve gear. The piston works in the cylinder, to which steam is admitted by the action of the valve gear, and communicates motion to the machinery to be actuated. Steam engines are thus classified: 1. According to the wat the steam is used or applied, as condencing, noncondencing, compound, double-acting, single-acting, triple-expansion, etc. 2. According to the motion of the piston, as reciprocating, rotary, etc. 3. According to the motion imparted by the engine, as rotative and nonrotative. 4. According to the arrangement of the engine, as stationary, portable, and semiportable engines, beam engine, oscillating engine, direct-acting and back-acting engines, etc. 5. According to their uses, as portable, marine, locomotive, pumping, blowing, winding, and stationary engines. Locomotive and portable engines are usually high-pressure, noncondencing, rotative, and direct-acting. Marine engines are high or low pressure, rotative, and generally condencing, double-acting, and compound. Paddle engines are generally beam, sideScrew engines are generally direct-acting, back-acting, or oscillating. Stationary engines belong to various classes, but are generally rotative. A horizontal or inclined stationary steam engine is called a left-hand or a right-hand engine when the crank shaft and driving pulley are on the left-hand side, or the right-hand side, respectively, or the engine, to a person looking at them from the cylinder, and is said to run forward or backward when the crank traverses the upward half, or lower half, respectively, of its path, while the piston rod makes its stroke outward from the cylinder. A marine engine, or the engine of a locomotive, is said to run forward when its motion is such as would propel the vessel or the locomotive forward. Steam engines are further classified as double-cylinder, disk, semicylinder, trunk engines, etc. Machines, such as cranes, hammers, etc., of which the steam engine forms a part, are called steam cranes, steam hammers, etc. See Illustration in Appendix. Back-acting, or Back-action, steam engine, a steam engine in which the motion is transmitted backward from the crosshead to a crank which is between the crosshead and the cylinder, or beyond the cylinder.
-- Portable steam engine, a steam engine combined with, and attached to, a boiler which is mounted on wheels so as to admit of easy transportation; -- used for driving machinery in the field, as trashing machines, draining pumps, etc.
-- Semiportable steam engine, a steam engine combined with, and attached to, a steam boiler, but not mounted on wheels.

STEAMER
Steam"er, n.

1. A vessel propelled by steam; a steamship or steamboat.

2. A steam fire engine. See under Steam.

3. A road locomotive for use on common roads, as in agricultural operations.

4. A vessel in which articles are subjected to the action of steam, as in washing, in cookery, and in various processes of manufacture.

5. (Zoöl.)

Defn: The steamer duck. Steamer duck (Zoöl.), a sea duck (Tachyeres cinereus), native of Patagonia and Terra del Fuego, which swims and dives with great agility, but which, when full grown, is incapable of flight, owing to its very small wings. Called also loggerhead, race horse, and side wheel duck.

STEAMINESS
Steam"i*ness, n.

Defn: The quality or condition of being steamy; vaporousness; mistness.

STEAMSHIP
Steam"ship‘, n.

Defn: A ship or seagoing vessel propelled by the power of steam; a steamer.

STEAMY
Steam"y, a.

Defn: Consisting of, or resembling, steam; full of steam; vaporous; misty. Cowper.

STEAN
Stean, n. & v.

Defn: See Steen. Spenser.

STEANINGP
Stean"ingp, n.

Defn: See Steening.

STEAPSIN
Ste*ap"sin, n. (Physiol Chem.)

Defn: An unorganized ferment or enzyme present in pancreatic juice. It decomposes neutral fats into glycerin and fatty acids.

STEARATE
Ste"a*rate, n. (Chem.)

Defn: A salt of stearic acid; as, ordinary soap consists largely of sodium or potassium stearates.

STEARIC
Ste*ar"ic, a. Etym: [Cf. F. stéarique.] (Physiol. Chem.)

Defn: Pertaining to, or obtained from, stearin or tallow; resembling tallow. Stearic acid (Chem.), a monobasic fatty acid, obtained in the form of white crystalline scales, soluble in alcohol and ether. It melts to an oily liquid at 69°C.C18H36O2, CH3.(CH2)16.COOH; sodium stearate, with sodium palmitate, is the main component of ordinary bar soaps (Such as Ivory soap).

STEARIN
Ste"a*rin, n. Etym: [Gr. stéarine.] (Physiol. Chem.)

Defn: One of the constituents of animal fats and also of some vegetable fats, as the butter of cacao. It is especially characterized by its solidity, so that when present in considerable quantity it materially increases the hardness, or raises the melting point, of the fat, as in mutton tallow. Chemically, it is a compound of glyceryl with three molecules of stearic acid, and hence is technically called tristearin, or glyceryl tristearate.

STEAROLIC
Steʻa*rol"ic, a. Etym: [Stearic + oleic + -ic.] (Chem.)

Defn: Of, pertaining to, or designating, an acid of the acetylene series, isologous with stearis acid, and obtained, as a white crystalline substance, from oleïc acid.

STEARONE
Ste"a*rone, n. (Chem.)

Defn: The ketone of stearic acid, obtained as a white crystalline substance, (C17H35)2.CO, by the distillation of calcium stearate.

STEAROPTENE
Steʻa*rop"tene, n. Etym: [Stearic + -optene as in elæoptene.] (Chem.)

Defn: The more solid ingredient of certain volatile oils; -- contrasted with elæoptene.

STEARRHEA
Steʻar*rhe"a, n. Etym: [NL., from Gr. (Med.)

Defn: seborrhea.

STEARYL
Ste"a*ryl, n. Etym: [Stearic + -yl.] (Chem.)

Defn: The hypothetical radical characteristic of stearic acid.

STEATITE
Ste"a*tite, n. Etym: [Gr. stéatite.] (Min.)

Defn: A massive variety of talc, of a grayish green or brown color. It forms extensive beds, and is quarried for fireplaces and for coarse utensils. Called also potstone, lard stone, and soapstone.

STEATITIC
Steʻa*tit"ic, n. (Min.)

Defn: Pertaining to, or of the nature of, steatite; containing or resembling steatite.

STEATOMA
Steʻa*to"ma, n. Etym: [L., fr. Gr. (Med.)

Defn: A cyst containing matter like suet.

STEATOMATOUS
Steʻa*tom"a*tous, a. (Med.)

Defn: Of the nature of steatoma.

STEATOPYGA
Ste'a*top"y*ga, n. Etym: [NL., fr. Gr.

Defn: A remarkable accretion of fat upon the buttocks of Africans of certain tribes, especially of Hottentot women.

STEATOPYGOUS
Ste'a*top"y*gous, a.

Defn: Having fat buttocks.
Specimens of the steatopygous Abyssinian breed. Burton.

STED; STEDFAST; STEDFASTLY
Sted, n., Sted"fast, a., Sted"fast*ly, adv., etc.

Defn: See Stead, Steadfast, etc.

STEE
Stee, n. Etym: [Cf. G. stiege. *164. See Stair.]

Defn: A ladder. [Obs. or Prov. Eng.] [Written also stey.]

STEED
Steed, n. Etym: [OE. stede, AS. steda a stud-horse, war horse, fr. stod a stud of breeding steeds; akin to G. stute a mare, Icel. stedda, sto, a stud. *163. See Stud of horses.]

Defn: A horse, especially a spirited horse for state of war; -- used chiefly in poetry or stately prose. "A knight upon a steed." Chaucer.
Mounted upon a hot and fiery steed. Shak.

STEEDLESS
Steed"less, a.

Defn: Having no steed; without a horse.

STEEK; STEIK
Steek, Steik, v. t. Etym: [Cf. Stick, v. t.]

Defn: To pierce with a sharp instrument; hence, to stitch; to sew; also, to fix; to fasten. [Scot.]

STEEL
Steel, n. Etym: [AS. stel, styl, style; akin to D. staal, G. stahl, OHG. stahal, Icel. stal, Dan. staal, Sw. stål, Old Prussian stakla.]

1. (Metal)

Defn: A variety of iron intermediate in composition and properties between wrought iron and cast iron (containing between one half of one per cent and one and a half per cent of carbon), and consisting of an alloy of iron with an iron carbide. Steel, unlike wrought iron, can be tempered, and retains magnetism. Its malleability decreases, and fusibility increases, with an increase in carbon.

2. An instrument or implement made of steel; as: --
(a) A weapon, as a sword, dagger, etc. "Brave Macbeth . . . with his brandished steel." Shak.
While doubting thus he stood, Received the steel bathed in his brother's blood. Dryden.

(b) An instrument of steel (usually a round rod) for sharpening knives.
(c) A piece of steel for striking sparks from flint.

3. Fig.: Anything of extreme hardness; that which is characterized by sternness or rigor. "Heads of steel." Johnson. "Manhood's heart of steel." Byron.

4. (Med.)

Defn: A chalybeate medicine. Dunglison.

Note: Steel is often used in the formation of compounds, generally of obvious meaning; as, steel-clad, steel-girt, steel-hearted, steel-plated, steel-pointed, etc. Bessemer steel (Metal.) See in the Vocabulary.
-- Blister steel. (Metal.) See under Blister.
-- Cast steel (Metal.), a fine variety of steel, originally made by smelting blister or cementation steel; hence, ordinarily, steel of any process of production when remelted and cast.
-- Cromium steel (Metal.), a hard, tenacious variety containing a little cromium, and somewhat resembling tungsten steel.
-- Mild steel (Metal.), a kind of steel having a lower proportion of carbon than ordinary steel, rendering it softer and more malleable.
-- Puddled steel (Metal.), a variety of steel produced from cast iron by the puddling process.
-- Steel duck (Zoöl.), the goosander, or merganser. [Prov. Eng.] -- Steel mill. (a) (Firearms) See Wheel lock, under Wheel. (b) A mill which has steel grinding surfaces. (c) A mill where steel is manufactured.
-- Steel trap, a trap for catching wild animals. It consists of two iron jaws, which close by means of a powerful steel spring when the animal disturbs the catch, or tongue, by which they are kept open.
-- Steel wine, wine, usually sherry, in which steel filings have been placed for a considerable time, -- used as a medicine.
-- Tincture of steel (Med.), an alcoholic solution of the chloride of iron.
-- Tungsten steel (Metal.), a variety of steel containing a small amount of tungsten, and noted for its tenacity and hardness, as well as for its malleability and tempering qualities. It is also noted for its magnetic properties.

STEEL
Steel, v. t. [imp. & p. p. Steeled; p. pr. & vb. n. Steeling.] Etym: [AS. stlan: cf. Icel. stæla. See Steel, n.]

1. To overlay, point, or edge with steel; as, to steel a razor; to steel an ax.

2. To make hard or strong; hence, to make insensible or obdurate.
Lies well steeled with weighty arguments. Shak.
O God of battles! steel my soldier's hearts. Shak.
Why will you fight against so sweet a passion, And steel your heart to such a world of charms Addison.

3. Fig.: To cause to resemble steel, as in smoothness, polish, or other qualities.
These waters, steeled By breezeless air to smoothest polish. Wordsworth.

4. (Elec.)

Defn: To cover, as an electrotype plate, with a thin layer of iron by electrolysis. The iron thus deposited is very hard, like steel.

STEELBOW GOODS
Steel"bow‘ goods". (Scots Law)

Defn: Those goods on a farm, such as corn, cattle, implements husbandry, etc., which may not be carried off by a removing tenant, as being the property of the landlord.

STEELER
Steel"er, n.

Defn: One who points, edges, or covers with steel.

STEELER
Steel"er, n. (Shipbuilding)

Defn: Same as Stealer.

STEELHEAD
Steel"head‘, n.

1. (Zoöl.)

Defn: A North Pacific salmon (Salmo Gairdneri) found from Northern California to Siberia; -- called also hardhead, and preesil.

2. (Zoöl.)

Defn: The ruddy duck.

STEELINESS
Steel"i*ness, n.

Defn: The quality of being steely.

STEELING
Steel"ing, n.

Defn: The process of pointing, edging, or overlaying with steel; specifically, acierage. See Steel, v.

STEELY
Steel"y, a.

1. Made of steel; consisting of steel. "The steely point of Clifford’s lance." Shak.
Around his shop the steely sparkles flew. Gay.

2. Resembling steel; hard; firm; having the color of steel. "His hair was steely gray." The Century.
She would unarm her noble heart of that steely resistance against the sweet blows of love. Sir P. Sidney.
Steely iron, a compound of iron containing less than one half of one per cent of carbon.

STEELYARD
Steel"yard, n. Etym: [So named from a place in London called the Steelyard, which was a yard in which steel was sold.]

Defn: A form of balance in which the body to be weighed is suspended from the shorter arm of a lever, which turns on a fulcrum, and a counterpoise is caused to slide upon the longer arm to produce equilibrium, its place upon this arm (which is notched or graduated) indicating the weight; a Roman balance; -- very commonly used also in the plural form, steelyards.

STEEM
Steem, n. & v.

Defn: See Esteem. [Obs.] Spenser.

STEEM
Steem, n. & v.

Defn: See 1st and 2nd Stem. [Obs.] Chaucer.

STEEN
Steen, n. Etym: [AS. st. See Stone.] [Written also stean.]

1. A vessel of clay or stone. "An huge great earth-pot steane." Spenser.

2. A wall of brick, stone, or cement, used as a lining, as of a well, cistern, etc.; a steening.

STEEN
Steen, v. t. Etym: [AS. st to adorn with stones or gems. See Stone.]

Defn: To line, as a well, with brick, stone, or other hard material. [Written also stean, and stein.]

STEENBOK
Steen"bok', n. Etym: [D. steen stone + bok buck.] (Zoöl.)

Defn: Same as Steinbock.

STEENING
Steen"ing, n.

Defn: A lining made of brick, stone, or other hard material, as for a well. [Written also steaning.]

STEENKIRK; STEINKIRK
Steen"kirk', Stein"kirk', n. Etym: [So called from the battle of Steinkirk, in 1692, on which occasion the French nobles had no time to arrange their lace neckcloths.]

Defn: A kind of neckcloth worn in a loose and disorderly fashion.

STEEP
Steep (step), a.

Defn: Bright; glittering; fiery. [Obs.]
His eyen steep, and rolling in his head. Chaucer.

STEEP
Steep, v. t. [imp. & p. p. Steeped (stept); p. pr. & vb. n. Steeping.] Etym: [OE. stepen, probably fr. Icel. steypa to cause to stoop, cast down, pour out, to cast metals, causative of stupa to stoop; cf. Sw. stöpa to cast, to steep, Dan. stöbe, D. & G. stippen to steep, to dip. Cf. Stoop, v. t.]

Defn: To soak in a liquid; to macerate; to extract the essence of by soaking; as, to soften seed by steeping it in water. Often used figuratively.

Let fancy still my sense in Lethe steep. Shak.
In refreshing dew to steep The little, trembling flowers. Wordsworth.
The learned of the nation were steeped in Latin. Earle.

STEEP
Steep, v. i.

Defn: To undergo the process of soaking in a liquid; as, the tea is steeping. [Colloq.]

STEEP
Steep, n.

1. Something steeped, or used in steeping; a fertilizing liquid to hasten the germination of seeds.

2. A rennet bag. [Prov. Eng.]

1. To move the foot in walking; to advance or recede by raising and moving one of the feet to another resting place, or by moving both feet in succession.

2. To walk; to go on foot; esp., to walk a little distance; as, to step to one of the neighbors.

3. To walk slowly, gravely, or resolutely.
Home the swain retreats, His flock before him stepping to the fold. Thomson.

4. Fig.: To move mentally; to go in imagination.
They are stepping almost three thousand years back into the remotest antiquity. Pope.
To step aside, to walk a little distance from the rest; to retire from company.
 -- To step forth, to move or come forth.
 -- To step in or into. (a) To walk or advance into a place or state, or to advance suddenly in.
Whosoever then first, after the troubling of the water, stepped in, was made whole of whatsoever disease he had. John v. 4.
(b) To enter for a short time; as, I just stepped into the house. (c) To obtain possession without trouble; to enter upon easily or suddenly; as, to step into an estate.
 -- To step out. (a) (Mil.) To increase the length, but not the rapidity, of the step, extending it to thirty-tree inches. (b) To go

out for a short distance or a short time.
-- To step short (Mil.), to diminish the length or rapidity of the step according to the established rules.

STEP
Step, v. t.

1. To set, as the foot.

2. (Naut.)

Defn: To fix the foot of (a mast) in its step; to erect. To step off, to measure by steps, or paces; hence, to divide, as a space, or to form a series of marks, by successive measurements, as with dividers.

STEP
Step, n. Etym: [AS. stæpe. See Step, v. i.]

1. An advance or movement made by one removal of the foot; a pace.

2. A rest, or one of a set of rests, for the foot in ascending or descending, as a stair, or a round of a ladder.
The breadth of every single step or stair should be never less than one foot. Sir H. Wotton.

3. The space passed over by one movement of the foot in walking or running; as, one step is generally about three feet, but may be more or less. Used also figuratively of any kind of progress; as, he improved step by step, or by steps.
To derive two or three general principles of motion from phenomena, and afterwards to tell us how the properties and actions of all corporeal things follow from those manifest principles, would be a very great step in philosophy. Sir I. Newton.

4. A small space or distance; as, it is but a step.

5. A print of the foot; a footstep; a footprint; track.

6. Gait; manner of walking; as, the approach of a man is often known by his step.

7. Proceeding; measure; action; an act.

Defn: Same as Platyelminthes.

STEREO-
Ste"re*o-. Etym: [Gr. stereo‘s solid. See Stare to gaze.]

Defn: A combining form meaning solid, hard, firm, as in stereo-chemistry, stereography.

STEREOBATE
Ste"re*o*bate, n. Etym: [Gr. stereo‘s solid + stéréobate.] (Arch.)

Defn: The lower part or basement of a building or pedestal; -- used loosely for several different forms of basement.

STEREO-CHEMIC; STEREO-CHEMICAL
Ste‘re*o-chem"ic, Ste‘re*o-chem"ic*al, a. (Chem.)

Defn: Pertaining to, or illustrating, the hypothetical space relations of atoms in the molecule; as, a stereo-chemic formula.

STEREO-CHEMISTRY
Ste‘re*o-chem"is*try, n. Etym: [Stereo- + chemistry.] (Chem.)

Defn: Chemistry considered with reference to the space relations of atoms.

STEREOCHROME
Ste"re*o*chrome, n.

Defn: Stereochromic picture.

STEREOCHROMIC

Ste‘re*o*chro"mic, a.

Defn: Pertaining to the art of stereochromy; produced by stereochromy.
-- Ste‘re*o*chro"mic*al*ly, adv.

STEREOCHROMY
Ste‘re*och"ro*my, n. Etym: [Stereo- + Gr. chrw^ma color.]

Defn: A style of painting on plastered walls or stone, in which the colors are rendered permanent by sprinklings of water, in which is mixed a proportion of soluble glass (a silicate of soda).

STEREOELECTRIC
Ste‘re*o*e*lec"tric, a. Etym: [Stereo- + electric.] (Physics)

Defn: Of or pertaining to the generation of electricity by means of solid bodies alone; as, a stereoelectric current is one obtained by means of solids, without any liquid.

STEREOGRAM
Ste"re*o*gram, n. Etym: [Stereo- + -gram.]

STEREOGRAPH
Ste"re*o*graph, n. Etym: [Stereo- + -graph.]

Defn: Any picture, or pair of pictures, prepared for exhibition in the stereoscope. Stereographs are now commonly made by means of photography.

STEREOGRAPHIC; STEREOGRAPHICAL
Ste‘re*o*graph"ic, Ste‘re*o*graph"ic*al, a. Etym: [Cf. F. stéréographique.]

Defn: Made or done according to the rules of stereography; delineated on a plane; as, a stereographic chart of the earth. Stereographic projection (Geom.), a method of representing the sphere in which the center of projection is taken in the surface of the sphere, and the plane upon which the projection is made is at right andles to the diameter passing through the center of projection.

STEREOGRAPHICALLY
Ste‘re*o*graph"ic*al*ly, adv.

Defn: In a stereographical manner; by delineation on a plane.

STEREOGRAPHY
Ste‘re*og"ra*phy, n. Etym: [Stereo- + graphy: cf. F. stéréographie.]

Defn: The art of delineating the forms of solid bodies on a plane; a branch of solid geometry which shows the construction of all solids which are regularly defined.

Note: By cutting pieces of cardboard, or other suitable material, in the forms represented in the cut, folding them along the lines indicated, and joining their edges, the five regular solids may be formed.

STEREOMETER
Ste‘re*om"e*ter, n. Etym: [Stereo- + meter.] (Physics)

1. An instrument for measuring the solid contents of a body, or the capacity of a vessel; a volumenometer.

2. An instrument for determining the specific gravity of liquid bodies, porous bodies, and powders, as well as solids.

STEREOMETRIC; STEREOMETRICAL
Ste‘re*o*met"ric, Ste‘re*o*met"ric*al, a. Etym: [Cf. F. stéréométrique.]

Defn: Of or pertaining to stereometry; performed or obtained by stereometry.
 -- Ste‘re*o*met"ric*al*ly, adv.

STEREOMETRY
Ste‘re*om"e*try, n. Etym: [Stereo- + -metry: cf. F. stéréométrie.]

Defn: The art of measuring and computing the cubical contents of bodies and figures; -- distinguished from planimetry.

STEREOMONOSCOPE
Ste‘re*o*mon"o*scope, n. Etym: [Stereo- + mono- + -scope.]

Defn: An instrument with two lenses, by which an image of a single picture projected upon a screen of ground glass is made to present an appearance of relief, and may be viewed by several persons at once.

STEREOPLASM
Ste"re*o*plasm, n. Etym: [Stereo- + Gr. (Biol.)

Defn: The solid or insoluble portion of the cell protoplasm. See Hygroplasm.

STEREOPTICON
Ste‘re*op"ti*con, n. Etym: [NL. See Stereo-, and Optic.]

Defn: An instrument, consisting essentially of a magic lantern in which photographic pictures are used, by which the image of a landscape, or any object, may be thrown upon a screen in such a manner as to seem to stand out in relief, so as to form a striking and accurate representation of the object itself; also, a pair of magic lanterns for producing the effect of dissolving views.

STEREOSCOPE
Ste"re*o*scope, n. Etym: [Stereo- + -scope.]

Defn: An optical instrument for giving to pictures the appearance of solid forms, as seen in nature. It combines in one, through a bending of the rays of light, two pictures, taken for the purpose from points of view a little way apart. It is furnished with two eyeglasses, and by refraction or reflection the pictures are superimposed, so as to appear as one to the observer.

Note: In the reflecting stereoscope, the rays from the two pictures are turned into the proper direction for stereoscopic vision by two plane mirrors set at an angle with each other, and between the pictures. In the lenticular stereoscope, the form in general use, the eyeglasses are semilenses, or marginal portions of the same convex lenses, set with their edges toward each other, so that they deflect the rays coming from the picture so as to strike the eyes as if coming direct from an intermediate point, where the two pictures are seen apparently as one.

STEREOSCOPIC; STEREOSCOPICAL
Ste're*o*scop"ic, Ste're*o*scop"ic*al, a.

Defn: Of or pertaining to the stereoscope; characteristic of, or adapted to, the stereoscope; as, a stereoscopic effect; the stereoscopic function of the eyeglasses; stereoscopic views.
 -- Ste're*o*scop"ic*al*ly, adv.

STEREOSCOPIST
Ste're*os"co*pist, n.

Defn: One skilled in the use or construction of stereoscopes.

STEREOSCOPY
Ste're*os"co*py, n.

Defn: The art or science of using the stereoscope, or of constructing the instrument or the views used with it.

STEREOSTATIC
Ste're*o*stat"ic, a. Etym: [Stereo- + static.] (Civil. Engin.)

Defn: Geostatic.

STEREOTOMIC; STEREOTOMICAL
Ste're*o*tom"ic, Ste're*o*tom"ic*al, a.

Defn: Of or pertaining to stereotomy; performed by stereotomy.

STEREOTOMY

7. (Chron.)

Defn: A mode of reckoning time, with regard to the Julian and Gregorian calendars.

Note: Style is Old or New. The Old Style follows the Julian manner of computing the months and days, or the calendar as established by Julius Cæsar, in which every fourth year consists of 366 days, and the other years of 365 days. This is about 11 minutes in a year too much. Pope Georgy XIII. reformed the calendar by retrenching 10 days in October, 1582, in order to bring back the vernal equinox to the same day as at the time of the Council of Nice, A.D. 325. This reformation was adopted by act of the British Parliament in 1751, by which act 11 days in September, 1752, were retrenched, and the third day was reckoned the fourteenth. This mode of reckoning is called New Style, according to which every year divisible by 4, unless it is divisible by 100 without being divisible by 400, has 366 days, and any other year 365 days. Style of court, the practice or manner observed by a court in its proceedings. Ayliffe.

SUBLIMITY
Sub*lim"i*ty, n.; pl. Sublimities. Etym: [L. sublimitas: cf. F. sublimité.]

1. The quality or state of being sublime (in any sense of the adjective).

2. That which is sublime; as, the sublimities of nature.

Syn.
-- Grandeur; magnificence.
-- Sublimity, Grandeur. The mental state indicated by these two words is the same, namely, a mingled emotion of astonishment and awe. In speaking of the quality which produces this emotion, we call it grandeur when it springs from what is vast in space, power, etc.; we call it sublimity when it springs from what is elevated far above the ordinary incidents of humanity. An immense plain is grand. The heavens are not only grand, but sublime (as the predominating emotion), from their immense height. Exalted intellect, and especially exalted virtue under severe trials, give us the sense of moral sublimity, as in the case of our Savior in his prayer for his murderers. We do not speak of Satan, when standing by the fiery gulf, with his "unconquerable will and study of revenge," as a sublime object; but there is a melancholy grandeur thrown around him, as of an "archangel ruined."

SUGAR
Sug"ar, n. Etym: [OE. sugre, F. sucre (cf. It. zucchero, Sp. azúcar), fr. Ar. sukkar, assukkar, fr. Skr. çarkara sugar, gravel; cf. Per. shakar. Cf. Saccharine, Sucrose.]

1. A sweet white (or brownish yellow) crystalline substance, of a sandy or granular consistency, obtained by crystallizing the evaporated juice of certain plants, as the sugar cane, sorghum, beet root, sugar maple, etc. It is used for seasoning and preserving many kinds of food and drink. Ordinary sugar is essentially sucrose. See

the Note below.

Note: The term sugar includes several commercial grades, as the white or refined, granulated, loaf or lump, and the raw brown or muscovado. In a more general sense, it includes several distinct chemical compounds, as the glucoses, or grape sugars (including glucose proper, dextrose, and levulose), and the sucroses, or true sugars (as cane sugar). All sugars are carbohydrates. See Carbohydrate. The glucoses, or grape sugars, are ketone alcohols of the formula C6H12O6, and they turn the plane of polarization to the right or the left. They are produced from the amyloses and sucroses, as by the action of heat and acids of ferments, and are themselves decomposed by fermentation into alcohol and carbon dioxide. The only sugar (called acrose) as yet produced artificially belongs to this class. The sucroses, or cane sugars, are doubled glucose anhydrides of the formula C12H22O11. They are usually not fermentable as such (cf. Sucrose), and they act on polarized light.

2. By extension, anything resembling sugar in taste or appearance; as, sugar of lead (lead acetate), a poisonous white crystalline substance having a sweet taste.

3. Compliment or flattery used to disguise or render acceptable something obnoxious; honeyed or soothing words. [Colloq.] Acorn sugar. See Quercite.

-- Cane sugar, sugar made from the sugar cane; sucrose, or an isomeric sugar. See Sucrose.

-- Diabetes, or Diabetic, sugar (Med. Chem.), a variety of sugar (probably grape sugar or dextrose) excreted in the urine in diabetes mellitus.

-- Fruit sugar. See under Fruit, and Fructose.

-- Grape sugar, a sirupy or white crystalline sugar (dextrose or glucose) found as a characteristic ingredient of ripe grapes, and also produced from many other sources. See Dextrose, and Glucose.

-- Invert sugar. See under Invert.

-- Malt sugar, a variety of sugar isomeric with sucrose, found in malt. See Maltose.

-- Manna sugar, a substance found in manna, resembling, but distinct from, the sugars. See Mannite.

-- Milk sugar, a variety of sugar characteristic of fresh milk, and isomeric with sucrose. See Lactose.

-- Muscle sugar, a sweet white crystalline substance isomeric with, and formerly regarded to, the glucoses. It is found in the tissue of muscle, the heart, liver, etc. Called also heart sugar. See Inosite.

-- Pine sugar. See Pinite.

-- Starch sugar (Com. Chem.), a variety of dextrose made by the action of heat and acids on starch from corn, potatoes, etc.; -- called also potato sugar, corn sugar, and, inaccurately, invert sugar. See Dextrose, and Glucose.

-- Sugar barek, one who refines sugar.

-- Sugar beet (Bot.), a variety of beet (Beta vulgaris) with very large white roots, extensively grown, esp. in Europe, for the sugar obtained from them.

-- Sugar bush. See Sugar orchard.

-- Sugar camp, a place in or near a sugar orchard, where maple sugar is made.

-- Sugar candian, sugar candy. [Obs.] -- Sugar candy, sugar clarified and concreted or crystallized; candy made from sugar.

-- Sugar cane (Bot.), a tall perennial grass (Saccharum officinarium), with thick short-jointed stems. It has been cultivated for ages as the principal source of sugar.
-- Sugar loaf. (a) A loaf or mass of refined sugar, usually in the form of a truncated cone. (b) A hat shaped like a sugar loaf.
Why, do not or know you, grannam, and that sugar loaf J. Webster.
-- Sugar maple (Bot.), the rock maple (Acer saccharinum). See Maple.
-- Sugar mill, a machine for pressing out the juice of the sugar cane, usually consisting of three or more rollers, between which the cane is passed.
-- Sugar mite. (Zoöl.) (a) A small mite (Tyroglyphus sacchari), often found in great numbers in unrefined sugar. (b) The lepisma.
-- Sugar of lead. See Sugar, 2, above.
-- Sugar of milk. See under Milk.
-- Sugar orchard, a collection of maple trees selected and preserved for purpose of obtaining sugar from them; -- called also, sometimes, sugar bush. [U.S.] Bartlett.
-- Sugar pine (Bot.), an immense coniferous tree (Pinus Lambertiana) of California and Oregon, furnishing a soft and easily worked timber. The resinous exudation from the stumps, etc., has a sweetish taste, and has been used as a substitute for sugar.
-- Sugar squirrel (Zoöl.), an Australian flying phalanger (Belideus sciureus), having a long bushy tail and a large parachute. It resembles a flying squirrel. See Illust. under Phlanger.
-- Sugar tongs, small tongs, as of silver, used at table for taking lumps of sugar from a sugar bowl.

SULPHAMIC
Sulph*am"ic, a. (Chem.)

Defn: Of or pertaining to a sulphamide; derived from, or related to, a sulphamide; specifically, designating an amido acid derivative, NH2.SO2.OH, of sulphuric acid (analogous to sulphonic acid) which is not known in the free state, but is known in its salts.

SULPHAMIDE
Sulph*am"ide, n. (Chem.)

Defn: Any one of a series of amido compounds obtained by treating sulphuryl chloride with various amines.

SULPHANILIC
Sulph‘a*nil"ic, a. Etym: [From sulphuric + anilene.] (Chem.)

Defn: Of, pertaining to, or designating, an anilene sulphonic acid which is obtained as a white crystalline substance.

SULPHANTIMONATE
Sulph*an‘ti*mo"nate, n. (Chem.)

Defn: A salt of sulphantimonic acid.

SULPHANTIMONIC
Sulph*an‘ti*mon"ic, a. Etym: [Sulpho- + antimonic.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of antimony (called also thioantimonic acid) analogous to sulpharsenic acid.

SULPHANTIMONIOUS
Sulph*an‘ti*mo"ni*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of antimony (called also thioantimonious acid) analogous to sulpharsenious acid.

SULPHANTIMONITE
Sulph*an"ti*mo*nite‘, n. (Chem.)

Defn: A salt of sulphantimonious acid.

SULPHARSENATE
Sulph*ar"se*nate, n. (Chem.)

Defn: A salt of sulpharsenic acid.

SULPHARSENIC
Sulph‘ar*sen"ic, a. Etym: [Sulpho- + arsenic.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid (called also thioarsenic acid) analogous to arsenic acid, and known only in its salts.

SULPHARSENIOUS
Sulph‘ar*se"ni*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid (called also thioarsenious acid) analogous to arsenious acid, and known only in its salts.

SULPHARSENITE
Sulph*ar"se*nite, n. (Chem.)

Defn: A salt of sulpharsenious acid.

SULPHATE
Sul"phate, n. Etym: [NL. sulphas, sulphatis, fr. L. sulphur, sulfur,

brimstone, sulphur: cf. F. sulfate.] (Chem.)

Defn: A salt of sulphuric acid.

SULPHATIC
Sul*phat"ic, a. (Chem.)

Defn: Of, pertaining to, resembling, or containing, a sulphate or sulphates.

SULPHATO-
Sul"pha*to-. (Chem.)

Defn: A combining form (also used adjectively) denoting a sulphate as an ingredient in certain double salts; as, sulphato-carbonate. [R.]

SULPHAURATE
Sulph*au"rate, n. (Chem.)

Defn: A salt of sulphauric acid.

SULPHAURIC
Sulph*au"ric, a. Etym: [Sulpho- + aurum.] (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of gold (aurum), known only in its salts.

SULPHIDE
Sul"phide, n. (Chem.)

Defn: A binary compound of sulphur, or one so regarded; -- formerly called sulphuret. Double sulphide (Chem.), a compound of two sulphides.
 -- Hydrogen sulphide. (Chem.) See under Hydrogen.
 -- Metallic sulphide, a binary compound of sulphur with a metal.

SULPHINATE
Sul"phi*nate, n. (Chem.)

Defn: A salt of a sulphinic acid.

SULPHINDIGOTIC
Sulph*in‘di*got"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphonic acid obtained, as a blue solution, by dissolving indigo in sulphuric acid; -- formerly called also cerulic sulphuric acid, but properly called indigo-disulphonic acid.

SULPHINE
Sul"phine, n. (Chem.)

Defn: Any one of a series of basic compounds which consist essentially of sulphur united with hydrocarbon radicals. In general they are oily or crystalline deliquescent substances having a peculiar odor; as, trimethyl sulphine, (CH3)3S.OH. Cf. Sulphonium.

SULPHINIC
Sul*phin"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, any one of a series of acids regarded as acid ethereal salts of hyposulphurous acid; as, methyl sulphinic acid, CH3.SO.OH, a thick unstable liquid.

SULPHINIDE
Sul"phi*nide, n. Etym: [Sulpho- + amine + anhydride.] (Chem.)

Defn: A white or yellowish crystalline substance, C6H4.(SO2.CO).NH, produced artificially by the oxidation of a sulphamic derivative of toluene. It is the sweetest substance known, having over two hundred times the sweetening power of sugar, and is known in commerce under the name of saccharine. It has acid properties and forms salts (which are inaccurately called saccharinates). I. Remsen.

SULPHION
Sul"phi*on, n. Etym: [Sulpho- + ion.] (Chem.)

Defn: A hypothetical radical, SO4, regarded as forming the acid or negative constituent of sulphuric acid and the sulphates in electrolytic decomposition; -- so called in accordance with the binary theory of salts. [Written also sulphione.]

SULPHIONIDE
Sulph*i"on*ide, n. (Chem.)

Defn: A binary compound of sulphion, or one so regarded; thus, sulphuric acid, Hsulphionide.

SULPHITE
Sul"phite, n. Etym: [Cf. F. sulfite. See Sulphur.] (Chem.)

Defn: A salt of sulphurous acid.

SULPHO-
Sul"pho-. (Chem.)

Defn: A prefix (also used adjectively) designating sulphur as an ingredient in certain compounds. Cf. Thio-.

SULPHOARSENIC
Sul‘pho*ar*sen"ic, a. (Chem.)

Defn: Of, pertaining to, or containing, sulphur and arsenic; -- said of an acid which is the same as arsenic acid with the substitution of sulphur for oxygen.

SULPHOCARBONATE
Sul‘pho*car"bon*ate, n. (Chem.)

Defn: A salt of sulphocarbonic acid; a thiocarbonate.

SULPHOCARBONIC
Sul‘pho*car*bon"ic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphacid, H2CSO2 (called also thiocarbonic acid), or an acid, H2CS3, analogous to carbonic acid, obtained as a yellow oily liquid of a pungent odor, and forming salts.

SULPHOCYANATE
Sul‘pho*cy"a*nate, n. (Chem.)

Defn: A salt of sulphocyanic acid; -- also called thiocyanate, and formerly inaccurately sulphocyanide. Ferric sulphocyanate (Chem.), a dark red crystalline substance usually obtained in a blood-red solution, and recognized as a test for ferric iron.

SULPHOCYANIC
Sul‘pho*cy*an"ic, a. Etym: [See Sulphur, Cyanic.] (Chem.)

Defn: Of, pertaining to, derived from, or designating, a sulphacid, HSCN, analogous to cyanic acid, and obtained as a colorless deliquescent crystalline substance, having a bitter saline taste, and not poisonous.

SULPHOCYANIDE
Sul‘pho*cy"a*nide, n. (Chem.)

Defn: See Sulphocyanate.

SULPHOCYANOGEN
Sul‘pho*cy*an"o*gen, n. (Chem.)

Defn: See Persulphocyanogen. [Obs.]

SULPHONAL
Sul"pho*nal, n. (Med.)

Defn: A substance employed as a hypnotic, produced by the union of mercaptan and acetone.

SULPHONATE
Sul"pho*nate, n. (Chem.)

Defn: A salt of sulphonic acid.

SULPHONE
Sul"phone, n. (Chem.)

Defn: Any one of a series of compounds analogous to the ketones, and consisting of the sulphuryl group united with two hydrocarbon radicals; as, dimethyl sulphone, (CH.SO

SULPHONIC
Sul*phon"ic, a. (Chem.)

Defn: Pertaining to, or derived from, a sulphone; -- used specifically to designate any one of a series of acids (regarded as acid ethereal salts of sulphurous acid) obtained by the oxidation of the mercaptans, or by treating sulphuric acid with certain aromatic bases (as benzene); as, phenyl sulphonic acid, C6H5.SO2.OH, a stable colorless crystalline substance. Sulphonic group (Chem.), the hypothetical radical, SO2.OH, the characteristic residue of sulphonic acids.

SULPHONIUM
Sul*pho"ni*um, n. Etym: [Sulphur + ammonium.] (Chem.)

Defn: A hypothetical radical, SH3, regarded as the type and nucleus of the sulphines.

SULPHOPHOSPHATE
Sul‘pho*phos"phate, n. (Chem.)

Defn: A salt of sulphophosphoric acid.

SULPHOPHOSPHITE
Sul‘pho*phos"phite, n. (Chem.)

Defn: A salt of sulphophosphorous acid.

SULPHOPHOSPHORIC
Sul'pho*phos*phor"ic, a.

Defn: Of, pertaining to, or designating, a hypothetical sulphacid of phosphorus, analogous to phosphoric acid, and known in its salts.

SULPHOPHOSPHOROUS
Sul'pho*phos"phor*ous, a. (Chem.)

Defn: Of, pertaining to, or designating, a hypothetical acid of phosphorus, analogous to phosphorous acid, and known in its salts.

SULPHOSALT
Sul"pho*salt', n. (Chem.)

Defn: A salt of a sulphacid.

SULPHOSTANNATE
Sul'pho*stan"nate, n. (Chem.)

Defn: A salt of sulphostannic acid.

SULPHOSTANNIC
Sul'pho*stan"nic, a. (Chem.)

Defn: Of, pertaining to, or designating, a sulphacid of tin (more exactly called metasulphostannic acid), which is obtained as a dark brown amorphous substance, H

SULPHOTUNGSTATE
Sul'pho*tung"state, n. (Chem.)

Defn: A salt of sulphotungstic acid.

SULPHOTUNGSTIC
Sul'pho*tung"stic, a. (Chem.)

Defn: Of, pertaining to, or designating, hypothetical sulphacid of tungsten (called also sulphowolframic acid), analogous to sulphuric acid, and known in its salts.

SULPHOVINIC
Sul'pho*vin"ic, a. Etym: [Sulpho- + vinum wine: cf. F. sulfovinique.] (Chem.)

Defn: Of, pertaining to, and formerly designating, ethylsulphuric acid.

SULPHUR
Sul"phur, n. Etym: [L., better sulfur: cf. F. soufre.]

1. (Chem.)

Defn: A nonmetallic element occurring naturally in large quantities, either combined as in the sulphides (as pyrites) and sulphates (as gypsum), or native in volcanic regions, in vast beds mixed with gypsum and various earthy materials, from which it is melted out. Symbol S. Atomic weight 32. The specific gravity of ordinary octohedral sulphur is 2.05; of prismatic sulphur, 1.96.

Note: It is purified by distillation, and is obtained as a lemon-yellow powder (by sublimation), called flour, or flowers, of sulphur, or in cast sticks called roll sulphur, or brimstone. It burns with a blue flame and a peculiar suffocating odor. It is an ingredient of gunpowder, is used on friction matches, and in medicine (as a laxative and insecticide), but its chief use is in the manufacture of sulphuric acid. Sulphur can be obtained in two crystalline modifications, in orthorhombic octahedra, or in monoclinic prisms, the former of which is the more stable at ordinary temperatures. Sulphur is the type, in its chemical relations, of a group of elements, including selenium and tellurium, called collectively the sulphur group, or family. In many respects sulphur resembles oxygen.

2. (Zoöl.)

Defn: Any one of numerous species of yellow or orange butterflies of the subfamily Pierinæ; as, the clouded sulphur (Eurymus, or Colias, philodice), which is the common yellow butterfly of the Eastern United States. Amorphous sulphur (Chem.), an elastic variety of sulphur of a resinous appearance, obtained by pouring melted sulphur into water. On standing, it passes back into a brittle crystalline modification.
-- Liver of sulphur. (Old Chem.) See Hepar.
-- Sulphur acid. (Chem.) See Sulphacid.
-- Sulphur alcohol. (Chem.) See Mercaptan.
-- Sulphur auratum Etym: [L.] (Old Chem.), a golden yellow powder, consisting of antimonic sulphide, Sb2S5, -- formerly a famous nostrum.
-- Sulphur base (Chem.), an alkaline sulphide capable of acting as a base in the formation of sulphur salts according to the old dual theory of salts. [Archaic] -- Sulphur dioxide (Chem.), a colorless gas, SO2, of a pungent, suffocating odor, produced by the burning of sulphur. It is employed chiefly in the production of sulphuric acid, and as a reagent in bleaching; -- called also sulphurous anhydride, and formerly sulphurous acid.
-- Sulphur ether (Chem.), a sulphide of hydrocarbon radicals, formed like the ordinary ethers, which are oxides, but with sulphur in the place of oxygen.
-- Sulphur salt (Chem.), a salt of a sulphacid; a sulphosalt.
-- Sulphur showers, showers of yellow pollen, resembling sulphur in appearance, often carried from pine forests by the wind to a great distance.
-- Sulphur trioxide (Chem.), a white crystalline solid, SO3, obtained by oxidation of sulphur dioxide. It dissolves in water with a hissing noise and the production of heat, forming sulphuric acid, and is employed as a dehydrating agent. Called also sulphuric anhydride, and formerly sulphuric acid.
-- Sulphur whale. (Zoöl.) See Sulphur-bottom.
-- Vegetable sulphur (Bot.), lycopodium powder. See under Lycopodium.

SULPHURATE
Sul"phu*rate, a. Etym: [L. sulphuratus, sulfuratus.]

Defn: Sulphureous. [Poetic & R.] Dr. H. More.

SULPHURATE
Sul"phu*rate, v. t. [imp. & p. p. Sulphurated; p. pr. & vb. n. Sulphurating.] (Chem.)

Defn: To sulphurize. [Archaic]

SULPHURATION
Sul'phu*ra"tion, n. Etym: [Cf. F. sulfuration, L. sulphuratio,

sulfuratio, a vein of sulphur.]

Defn: The act or process of combining or impregnating with sulphur or its compounds; also, the state of being so combined or impregnated.

SULPHURATOR
Sul"phu*ra‘tor, n.

Defn: An apparatus for impregnating with, or exposing to the action of, sulphur; especially, an apparatus for fumigating or bleaching by means of the fumes of burning sulphur.

SULPHUR-BOTTOM
Sul‘phur-bot"tom, n. (Zoöl.)

Defn: A very large whalebone whale of the genus Sibbaldius, having a yellowish belly; especially, S. sulfureus of the North Pacific, and S. borealis of the North Atlantic; -- called also sulphur whale.

SULPHUREITY
Sul‘phu*re"i*ty, n.

Defn: The quality or state of being sulphureous. [Obs.] B. Jonson.

SULPHUREOUS
